SUBJECT: Professional Services Agreement between Ardurra Group, Inc. and the City of Cheyenne

Please find attached a Professional Services Agreement between Ardurra Group, Inc. and the City of Cheyenne for the Pershing Converse 19th Roundabout Operations Modifications project. While the configuration of this intersection as a modern roundabout has reduced the severity of collisions compared to the previous layout of the intersection, which included multiple traffic signals, the number of collisions remains a concern.

This project includes an independent review of a report prepared in 2019 and a review of the current operations of the roundabout. A summary of the findings and recommendations will be provided in a technical memorandum. Based on the findings and recommendations, design plans will be prepared, and the proposed improvements will be let for bidding. Ardurra staff will provide limited professional services during bidding and construction.

The financial implications associated with this PSA is \$186,500.00 Your approval of this agreement is respectfully requested.

**Converse Ave. – Pershing Blvd. – 19th St. Roundabout Operations Review & Modification Design
Ardurra Group, Inc. Scope & Fee Proposal**

The Converse Ave. – Pershing Blvd. – 19th St. roundabout was completed in December 2013 to replace the former layout, which had 125 collisions in the five-year period reviewed for the Alternatives Analysis prepared in 2006. While the roundabout reduced collision severity, the number of collisions per year has been an ongoing concern. In 2017, the roundabout was the subject of a Cheyenne Metropolitan Planning Organization (MPO) safety campaign. In 2019, MTJ Engineering reviewed the roundabout and provided several recommendations within a report that aimed at improving driver comprehension and reducing collisions. Ardurra has been tasked to review the recommendations, update and/or modify them as necessary, and provide a bid ready set of contract drawings and specifications targeted for bid advertisement in February 2027.

This Ardurra Exhibit A outlines a scope and fee proposal that addresses the following consultant actions:

- Develop an independent review of current roundabout operations and compare findings with the 2019 MTJ report. Summarize findings in a technical memorandum.
- Develop drawings, specifications, and construction cost opinion to 60% and 100% levels.
- Permit the 100% drawings through the City Engineering Plan Review (EPR) process.
- Support the project through advertisement and bidding.
- Construction Management Services (optional additional service)

SCOPE OF SERVICES

Task 1. Project Management, Administration, and Quality Control

This task acknowledges additional budget for **Tasks 1-6** for the project manager and administration staff to coordinate the project. This includes City correspondence, meetings (beginning July 2026), invoicing, schedule coordination, and progress reporting. Ardurra anticipates nine monthly meetings with agencies, and two review meetings to support the project. Quality Control reviews will be provided by senior, specialized staff for all submittals.

Task 1 Deliverables:

Two sets of review meeting minutes, nine invoices and status updates.

Task 2. Field Data Collection

Obtaining topographic survey data in support of drawing development. Survey will include signage location, pavement markings, existing roundabout geometry and drainage, and any marked utilities and utility structures. Additionally, Ardurra will coordinate with the City for footage of traffic operations during a period of both daylight and night time hours.

Task 2 Deliverables: None.

Task 2 Assumptions:

Boundary survey is not necessary, and in-depth utility research and coordination will not be required for this project. The City will provide a drone and pilot to capture traffic flow footage for two, two-hour periods.

Task 3. Project Development

Review current traffic counts, collision history, observed performance, and Cheyenne MPO forecast data to summarize findings for recommended improvements in a technical memorandum. SIDRA will be used to perform operational analysis. Compare these findings to the 2019 MTJ report and compare conclusions within the technical memorandum. Submit this memorandum to City Engineering staff and attend a review meeting to discuss findings and recommendations and 60% design parameters.

Task 3 Deliverables:

Technical memorandum and supporting data (i.e., traffic counts, collision history, turning movements analysis results).

Task 3 Assumptions:

City to provide as-built drawings and design parameters for original roundabout construction, if available.

Task 4. 60% & 100% Design

Advance project recommendations, incorporating City feedback on the technical memorandum from Task 3, to the 60% design level. This includes preparation of construction drawings, technical specifications, and an opinion of probable construction cost. Submit the 60% design package to the City and conduct a design review meeting.

Incorporate comments received during the 60% design review to advance the project to the 100% (final) design level, including updated drawings, specifications, and opinion of probable construction cost. Submit the 100% design package through the EPR portal for City review and respond to all City comments.

Task 4 Deliverables:

60% and 100% drawings (22x34) with the following sheets as necessary:

- Project identification and location map
- Notes, legend, & abbreviations
- Summary of bid items and estimated quantities
- Approach, roundabout, and roadway sections
- Curb and traffic island details/profiles
- Signing & Striping
- Illumination
- Temporary Traffic Control

Task 4 Assumptions:

- No major revisions beyond 60% will be necessary. Should any major changes be necessary, a contract modification may be required. This includes but is not limited to; adding/subtracting a lane due to new volume information and changes in design standards/requirements from the approving agency.
- Improvements are assumed to be modifications and retrofitting to the current roundabout configuration. Complete re-design of the roundabout is not anticipated.
- No submittals or revisions will be required with agencies other than the City. Up to two EPR cycles are anticipated.
- Landscaping design is not required for this project.
- If illumination design is required, it is limited to revisions to existing light fixtures or the addition of up to two light poles.
- Drawings will be developed per City's 2022 specifications, with industry standards (AASHTO & FHWA) used where agency guidance may be missing.
- Drawings will be provided electronically. Final drawings will be stamped electronically.

Task 5. Project Bid Documents and Bid Support

Construction drawings, technical specifications, and a blank bid schedule will be delivered electronically to the City's Public Purchasing department. Ardurra will attend the pre-bid meeting, address any questions from bidders, and work with Public Purchasing to develop one Addendum. Ardurra will provide a recommendation of award letter based on the bids received.

Task 5 Deliverables:

Bid documents, answers to questions received, and engineer's recommendation of award letter.

Task 5 Assumptions:

City will conduct pre-bid meeting, bid opening, and bid tabulation.

Task 6. Construction Management (Optional Additional Service)

Upon written authorization by the City, Ardurra will provide construction management services as follows:

Ardurra will work with the City and selected Contractor to schedule and facilitate a pre-construction meeting. Ardurra will provide an agenda and sign in sheet. Additionally, Ardurra will review material submittals, respond to RFIs, and document and evaluate any change orders. Ardurra will complete two, two-hour site visits in addition to the substantial and final completion walkthroughs. Ardurra will review up to four pay applications from the Contractor.
