MEMO

To: Honorable Mayor Patrick Collins and Members of the City Council
From: Charles W. Bloom
Subject: CheyenneNext - Comprehensive Plan Update
Date: August 24, 2026

Background:

The item for consideration is a contract for professional services to update the [Community Character element of the Cheyenne Comprehensive Plan \(PlanCheyenne\)](#). The Governing Body approval schedule is as follows:

- | | |
|-----------------------------|-------------------------------|
| • Introduction and Referral | August 24, 2026 |
| • Finance Committee | September 9, 2026 (Wednesday) |
| • Final Consideration | September 14, 2026 |

Eleven firms responded to the Request for Proposals (RFP). Three submittals were disqualified for failing to meet submittal requirements. The remaining eight submittals were evaluated by a selection committee comprising representatives from the City Council, Planning and Development, Engineering, the MPO, Laramie County Planning and Development, the Planning Commission, and a local developer.

The committee shortlisted and conducted in-person interviews with four firms:

- Cushing Terrell
- Houseal Lavigne Associates LLC
- Kimley-Horn
- Logan Simpson Design Inc.

Additional submittals evaluated but not shortlisted included Design Workshop, Glenn A. Rick Engineering & Development Company, Lotus Engineering and Sustainability, LLC, and Orion Planning + Design.

Following competitive evaluations and in-person firm presentations, Houseal Lavigne ranked highest among the competing consultants. None of the submitting firms qualified for local preference.

Through contract negotiations, staff worked with Houseal Lavigne to optimize both the schedule and fee. The scope was refined to condense the project timeline from 18 months down to **14 months** (targeting final adoption in November 2027) while incorporating land-use scenario planning and Placer.ai mobile device data to analyze regional commuting patterns.

The resulting professional services agreement is for a **not-to-exceed amount of \$351,790**.

Project Scope & Deliverables

Project timing and milestones are detailed in Exhibit A of the contract. Robust Steering Committee and public engagement will drive the process throughout.

The final deliverable will be a clear, concise, easy-to-read Comprehensive Plan designed to guide Cheyenne's future growth under current and projected development conditions. The plan will feature user-friendly goals and actionable statements to evaluate local development regulations and guide future land-use and policy decisions. Supporting deliverables include clear graphics, an implementation framework, and key maps covering future land use, active transportation networks, development barriers, and residential and technology growth suitability.

Funding Sources

The total contract price has been negotiated to be \$351,790.00 with a completion date of in November of 2027. Funding sources come from the \$240,000 budgeted as a one-time expense for the comprehensive plan update and a roll over of unspent County Pocket annexation budget totaling \$112,900 (Totaling \$352,900).

1. Professional Services Agreement

City Contract No. _____

PROFESSIONAL SERVICES AGREEMENT
for
CHEYENNENEXT - COMPREHENSIVE PLAN UPDATE

This Professional Services Agreement (“Agreement”) is made and entered into by and between the City of Cheyenne, located at 2101 O’Neil Avenue, Cheyenne, Wyoming 82001 (“City”), and Houseal Lavigne Associates, LLC, located at 188 West Randolph Street, Suite 200, Chicago, Illinois 60601 (“Consultant”). This Agreement shall become effective upon the date of the last signature affixed hereto.

RECITALS

In consideration of the mutual covenants and obligations herein expressed, it is agreed by and between the parties as follows:

1. **SCOPE OF WORK**

The Consultant agrees to provide services as described for the CheyenneNext – Comprehensive Plan Update Project in accordance with City of Cheyenne Request for Proposal (RFP) #7-26, issued via the OpenGov E-Procurement Portal, the Consultant’s submitted proposal, on file with the City of Cheyenne Purchasing Office within the City Treasurer’s Department, and the CheyenneNext Comprehensive Plan Update – Revised Scope, Fee, and Timeline. Each of the foregoing is incorporated herein by reference, and the *Revised Scope, Fee, and Timeline* is attached hereto as Exhibit A.

2. **TIME OF PERFORMANCE**

The work included in this Scope of Work shall be completed by November 30, 2027.

3. **COMPENSATION**

In consideration of the services to be performed pursuant to this Agreement, the Consultant will bill the City and the City agrees to pay Consultant as stated in Exhibit A for a total not to exceed amount of three hundred fifty-one thousand, seven hundred ninety dollars (\$351,790.00).

4. **CONSULTANT RESPONSIBILITY**

In providing services under this Agreement, the Consultant shall perform in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances. Upon notice to the Consultant, the Consultant will, without additional compensation, correct those services not meeting such a standard.

5. COMPLIANCE WITH LAWS

The Parties agree that they will perform their obligations as provided in this Agreement in accordance with all applicable laws and ordinances.

6. DRUG-FREE WORKPLACE

In compliance with the Drug-Free Workplace Act of November 1988, the City of Cheyenne has established an Alcohol and Controlled Substance Policy that pertains to alcohol and drug usage by City Employees. All architects, engineers, and other consultants under contract with City of Cheyenne, and their employees and sub-consultants, are required to comply with the provisions of the City's Alcohol and Controlled Substance Policy for drug and/or alcohol usage on City property or other sites occupied by the Consultant while performing the duties and responsibilities of the Agreement. It is the responsibility of the Consultant to familiarize themselves with the requirements of this policy and to inform all their employees and sub-consultants of the requirements and ensure their compliance. If the Consultant, their employees, or sub-consultants are found in violation of this policy, the Agreement may be terminated.

7. INDEMNIFICATION/HOLD HARMLESS

The Consultant agrees to indemnify, hold harmless, and defend the City from and against any and all liabilities, claims, penalties, forfeitures, and suits, and the cost and expenses incident thereto, including reasonable attorney's fees, which may hereafter arise as a result the performance of the Consultant's duties, including death or bodily injury to any person, destruction or damage to any property, contamination of or adverse effects on the environment, or any violation of governmental laws, regulations, or orders to the extent caused by (1) the Consultant's breach of any term or provision of this Agreement; or (2) any negligent or wrongful act, error, or omission by the Consultant, or its employees or sub-consultants in the performance of this Agreement. The Consultant acknowledges that it may incur a financial obligation to the City pursuant to the terms of this paragraph.

8. INSURANCE REQUIREMENTS

The Consultant must provide proof of the following insurance coverages:

Commercial General Liability Insurance

For claims arising out of bodily injury, illness, or death, or from damage to or destruction of property of others, including loss or use thereof, with minimum limits of \$1,000,000 per occurrence, \$2,000,000 aggregate for the entire term of the Agreement.

Workers' Compensation

Workers' compensation coverage shall be in effect for the entire term of the Agreement, as required by Wyoming law, for all employees or agents providing services under this Agreement. Consultant shall provide the City with proof of workers' compensation or employer's liability insurance coverage.

Professional Liability Insurance

The Consultant shall provide proof of professional liability insurance or errors and omissions liability insurance in an amount not less than \$500,000 to protect the City from any and all claims arising from the Consultant's negligence in the performance of duties under this Agreement. The City prefers that this liability insurance coverage be provided pursuant to an "occurrence" policy.

If this coverage is provided pursuant to a "claims made" policy:

- a. Consultant shall, concurrently with the execution of this Agreement, provide the City with a certificate of insurance demonstrating that such coverage is or shall be in effect at the time the Consultant begins the provision of services under this Agreement; and
- b. In the event the Consultant's services extend into a future policy period, the Consultant shall, prior to the policy expiration date, provide the City with a new certificate of insurance demonstrating that such coverage is or shall be in effect during all periods of time that Consultant will provide services under this Agreement; and
- c. Consultant shall maintain said "claims made" coverage for a period of five (5) years following the last date that Consultant has provided services under this Agreement; and
- d. In the event the Consultant or the insurer terminates "claims made" coverage prior to the expiration of the periods provided in subparagraphs a., b., or c. of this paragraph, the Consultant shall provide to the City advance written notification of the termination of said coverage and shall provide the City with an endorsement for an extended reporting period ("tail coverage") which shall be in effect for a period of time not less than five (5) years following the last date that Consultant has provided services under this Agreement.

Additional Insurance Information

The Consultant shall name the City of Cheyenne as **an Additional Insured** by endorsement on its insurance policies and shall provide the City with a copy of the endorsements. This requirement does not apply to workers' compensation and professional liability insurance policies.

Consultant shall provide the City with certificates of insurance acknowledging the above-stated coverages prior to beginning any work under this Agreement.

It is understood and agreed that these policies are primary and not contributory. All policies required under this Agreement shall be in effect for the duration of the Agreement. It shall be an affirmative obligation upon Consultant to immediately notify in writing the city risk manager, city clerk, and city attorney of any fact, circumstance, or occurrence that has resulted in or may result in the cancellation of, or substantive change

to any insurance coverage required by this Agreement, and failure to do so shall be construed to be a breach of this Agreement.

If requested by the City, the Consultant shall provide the City with copies of insurance policies and/or policy endorsements listing the City of Cheyenne as an additional insured. The City's failure to request or review such policies, endorsements, or certificates shall not affect the City's rights or Consultant's obligation hereunder.

Any insurance company providing coverage under this Agreement shall have a minimum A. M. Best rating of A- (excellent).

9. MINORITY AND DISADVANTAGED BUSINESS ENTERPRISES (49 C.F.R. Part 26)
All parties to this Agreement assure that no person will be excluded from participation in, denied the benefits of, or otherwise discriminated against, in connection with the award and performance of this Agreement on the grounds of age, race, color, disability, national origin, or sex.
10. MONTHLY REPORT
With every monthly billing, the Consultant shall provide the City Representative with a written statement of the status of the work with respect to the Scope of Work, time sheets, and work schedule. Failure to provide the required monthly report will delay processing of any payment request until the report is submitted.
11. INDEPENDENT CONSULTANT
The Consultant shall function as an independent consultant for the purposes of this Agreement. The Consultant shall assume sole responsibility for any debts or liabilities that may be incurred by the Consultant in fulfilling the terms of this Agreement. Nothing in this Agreement shall be interpreted as authorizing the Consultant or its agents or employees to act as an agent or representative of or on behalf of the City or to incur any obligation of any kind on the behalf of the City.
12. TAXES
The Consultant agrees to pay all valid taxes, excises, license fees, permit fees, bills, debts, and obligations incurred by and in connection with its operations under this Agreement.
13. DEFAULT
Each and every term and condition in this Agreement shall be deemed to be a material element of the Agreement. In the event either party should fail or refuse to perform according to the terms of this Agreement, such party may be declared in default.

14. REMEDIES

In the event a party has been declared in default, such defaulting party shall be allowed a period of fifteen (15) days within which to cure the default. In the event the default remains uncorrected, the non-defaulting party declaring default may elect to:

- a. Terminate the Agreement and seek damages, which damages shall not exceed the contract amount; or
- b. Treat the Agreement as continuing and require specific performance.

15. TERM AND TERMINATION

The term of this Agreement shall be from date of execution to **March 30, 2028**. The parties may by mutual written agreement renew or extend this Agreement. The City may, without cause, and upon thirty (30) days' written notice to the Consultant, terminate this Agreement in whole or in part at any time, for the City's convenience. Upon receipt of such notice, the Consultant shall:

- a. Discontinue all services affected; and
- b. Deliver to the City within five (5) days all data, drawings, specifications, reports, estimates, summaries, and such other information and materials as may have been accumulated by the Consultant in performing this Agreement, whether completed or in process.
- c. In the event of termination for convenience, the City will pay the Consultant for accepted work done and expenses incurred to the date of termination. Such acceptance shall not be unreasonably withheld.

16. ADDITIONAL REMEDIES

In the event the Consultant fails to strictly perform in accordance with this Agreement, the City may elect to correct the deficiencies and charge the Consultant. In the event of default of any of the conditions by either party which shall require the party not in default to commence legal or equitable action against the defaulting party each party shall bear its own costs and expenses, including without limitation, attorney's fees.

17. GOVERNING LAW, JURISDICTION AND VENUE

The construction, interpretation, and enforcement of this Agreement shall be governed by the laws of the State of Wyoming. The courts of the State of Wyoming shall have jurisdiction over any action arising out of this Agreement and over the parties, and the venue shall be the First Judicial District, Laramie County, Wyoming.

18. GOVERNMENTAL IMMUNITY

The City of Cheyenne, along with its officials and employees, does not waive its governmental immunity by entering into this Agreement, except to the extent necessary for the parties to pursue a contract action to clarify or enforce the written terms of the Agreement. Furthermore, the City specifically retains all immunities and defenses available to it as a sovereign or governmental entity pursuant to Wyo. Stat. § 1-39-101, *et seq.*, and all other relevant state and federal law. Designations of venue, choice of law, enforcement actions, and similar provisions should not be constructed as a waiver of

governmental immunity. The parties agree that any ambiguity in this Agreement shall not be strictly construed, either against or for either party, except that any ambiguity as to governmental or sovereign immunity shall be construed in favor of governmental immunity.

19. MONITORING ACTIVITIES

The City shall have the right to monitor all activities related to this Agreement that are performed by the Consultant or its sub-consultants. This shall include, but not be limited to, the right to make site inspections at any time and with reasonable notice; to bring experts and consultants on site to examine or evaluate completed work or work in progress; to examine the books, ledgers, documents, papers, and records pertinent to this Agreement; and to observe personnel in every phase of performance of the related work.

20. OWNERSHIP OF DOCUMENTS AND WORK PRODUCT

All deliverables by the Consultant, all work product of the Consultant, all notes, calculations, memoranda, or any other documentation generated by the Consultant pursuant to the scope of this Agreement, shall be the property of the City of Cheyenne and shall be provided to the City of Cheyenne immediately upon request.

21. NON-DISCRIMINATION

The Consultant shall comply with the Civil Rights Act of 1964, the Wyoming Fair Employment Practices Act (Wyo. Stat. § 27-9-105, *et seq.*), the Americans With Disabilities Act (ADA), as amended, 42 U.S.C. § 12101, *et seq.*, and the Age Discrimination Act of 1975 and any properly promulgated rules and regulations thereto, and shall not discriminate against any individual on the grounds of age, sex, creed, color, race, religion, national origin, ancestry, pregnancy or qualifying disability in connection with the performance under this Agreement.

22. FORCE MAJEURE.

The performance of the Agreement by either party shall be subject to force majeure including, but not limited to, acts of God, fire, flood, natural disaster, war or threat of war, acts or threats of terrorism, civil disorder, unauthorized strikes, governmental regulation or advisory, recognized health threats as determined by the World Health Organization, the Centers for Disease Control, or local government authority or health agencies (including, but not limited to, the health threats of COVID-19, H1N1, or similar infectious diseases), curtailment of transportation facilities, or other similar occurrence beyond the control of the parties, where any of those factors, circumstances, situations, or conditions or similar ones prevent, dissuade, or unreasonably delay the performance required by this Agreement. The Agreement may be cancelled by either party, without liability, damages, fees, or penalty, and any unused deposits or amounts paid shall be refunded, for any one or more of the above reasons, by written notice to the other party.

23. PROFESSIONAL REGISTRATION

The Consultant shall endorse, as required by law, plans and reports prepared under this Agreement and shall affix thereto his or her seal of professional registration, showing that he or she is licensed to practice in the State of Wyoming, if necessary.

24. ENTIRETY OF AGREEMENT

This Agreement consisting of seven (7) pages and Exhibit A – CheyenneNext Comprehensive Plan Update – Revised Scope, Fee, and Timeline, consisting of fourteen (14) pages; Request for Proposal RFP #7-26, issued via OpenGov E-Procurement Portal; Addendum One (1), issued via OpenGov E-Procurement Portal, and the Consultant's submitted proposal, consisting of thirty-six (36) pages; contains the entire understanding of the parties. There are no other terms or conditions, written or oral, concerning or controlling this matter.

IN WITNESS WHEREOF, the Parties to this Agreement, through their duly authorized representatives, have executed this Agreement on the days and dates set out below and certify that they have read, understood, and knowingly and voluntarily agreed to the terms and conditions of this Agreement. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

MEMORANDUM

Date: Wednesday, August 5, 2026

SENT VIA EMAIL

To: Charles W. Bloom, AICP, Director
City of Cheyenne Planning and Development Department
2101 O'Neil Avenue Room 205
Cheyenne, WY 82001

From: Houseal Lavigne
John Houseal, FAICP, Partner and Co-founder
Josh Koonce, AICP, Practice Lead

Re: **CheyenneNext Comprehensive Plan Update – Revised Scope, Fee, and Timeline**

Houseal Lavigne appreciates the opportunity to continue refining the scope of services for the CheyenneNext Comprehensive Plan Update. Based on discussions with the City, Houseal Lavigne has updated the attached **Scope of Services, Fee Schedule, and Project Timeline** to align with the City's priorities and anticipated project outcomes.

The revised scope maintains a comprehensive community-engagement and planning process while establishing a streamlined **14-month schedule through adoption**.

Key revisions and additions to the scope include:

- **Refined public-engagement program.** It is understood that all online engagement will be conducted through the City's Connect Cheyenne platform. The revised scope includes an online community survey, map.social, up to 16 stakeholder interview or focus-group sessions, DIY engagement kits, a Business Community Workshop, a Community Kick-off Open House, and a Community Visioning Workshop. Houseal Lavigne will attend one pop-up event scheduled in conjunction with another project trip and will prepare reusable materials for additional City staff-led pop-up outreach.
- **Clarified Steering Committee involvement.** The scope includes four Steering Committee meetings aligned with key project milestones: project kickoff, review of existing conditions, evaluation of the vision and land-use scenarios, and review of the draft Comprehensive Plan Update.
- **Reorganized existing-conditions analysis.** Related public-service, infrastructure, environmental, cultural, and community-facility topics have been consolidated under a coordinated **Services, Infrastructure, and Community Facilities** assessment. The revised scope also clarifies the intended policy-level review of public safety, utilities, parks and recreation, environmental conditions, cemetery planning, and arts and culture.

Exhibit A

- **Expanded mapping.** The Existing Conditions Memorandum will include an Existing Land Use Map and a Barriers and Opportunities Map.
- **Mobile Device Data Collection and Analysis.** The revised scope incorporates the previously identified Mobile Device Data Collection and Analysis additive alternate, with Mead & Hunt evaluating regional travel and mobility patterns using available probe-based, census-based, and regional travel-model data.
- **Added land-use scenario planning and fiscal comparison.** The Project Team will prepare up to three alternative land-use scenarios and evaluate them using planning-level indicators such as population, households, jobs, and potential property-tax and sales-tax revenue. The scenarios will be reviewed with City staff and the Steering Committee to select a Preferred Land Use Scenario that will serve as the basis for the draft Plan.
- **Strengthened housing and technology-development policy.** The Housing and Neighborhoods element will address housing supply, affordability, diversity, infill, residential land capacity, workforce growth, and relevant federal and state housing initiatives. As part of the Economic Development element, the Data Center and Large-Footprint Technology Development subsection will address land suitability, residential compatibility, infrastructure requirements, buffering, and fiscal considerations and will include a Technology and Residential Growth Suitability Map.

We believe these revisions provide a clear and efficient framework for completing the project while addressing the City's priority issues related to housing, data center development, infrastructure, mobility, fiscal sustainability, and implementation. We appreciate the City's continued coordination and look forward to finalizing the contract documents and beginning the planning process.

*City of Cheyenne “CheyenneNext” Comprehensive Plan Update
Prepared by Houseal Lavigne for Contract – August 5, 2026*

Contents

Scope of Work.....	1
Fee Schedule.....	11
Anticipated Project Timeline	12

Scope of Work

Step 1: Project Kick-off

Meetings will be conducted with key City staff, department heads, and the Steering Committee before undertaking the primary community outreach activities.

1a. Staff Coordination Call and Data Collection

The Project Team will host an initial coordination call with City staff to review the Scope of Work, project timeline, and key deliverables. As needed, check-in meetings with City staff will be held throughout the planning process to ensure clear and consistent communication.

The Project Team will outline data needs including, but not limited to, GIS data regarding parcels, building footprints, existing land use, zoning districts and overlays, community facilities (including City-owned properties, schools, parks, etc.), traffic volumes, traffic signals, transit, bike routes and trails, etc.; City branding guidelines and photos; past plans and studies; and a list of service providers with contact information.

1b. Staff Kick-Off Meeting

A kick-off meeting will be held with the City staff assigned to the Comprehensive Plan Update project. This first face-to-face meeting will allow us to review the project goals, scope, timeline, and deliverables. The Project Team will also address any outstanding data needs and discuss next steps.

1c. Department Heads Meeting

Immediately following the kick-off meeting with City staff, the Project Team will host a meeting with representatives from other City departments. The Comprehensive Plan Update will affect a variety of City-wide policies and support from City departments will be essential to plan implementation. The Project Team will work with City staff to engage other department heads throughout the process to ensure that plan recommendations are meaningful and actionable for all City departments.

1d. Staff-led Study Area Tour

The Project Team will conduct a study area tour with City staff to learn more about Cheyenne’s issues, recent projects, and development opportunities.

1e. Steering Committee Meeting – Project Kick-off Workshop (Mtg #1)

The City will identify members of the community to serve on the Steering Committee for the Comprehensive Plan Update process. The Steering Committee will serve as a community sounding board to advise on issues and provide overall planning direction. Steering Committee meetings are identified at key moments throughout the planning process to ensure that the planning process reflects the goals and values of the Cheyenne community. Steering Committee member participation will also help develop champions for the Plan and ensure that the adoption process moves smoothly.

Before planning work begins, this project initiation meeting will be held with the Steering Committee to set the foundation for the planning process and review and discuss the overall direction and policy issues facing the community. The purpose of the project initiation meeting will be to: (a) discuss the Steering Committee’s role for the project; (b) review overall project objectives; (c) refine the work program for the project; and (d) establish a preliminary

schedule for the project. The Steering Committee kick-off meeting will include a workshop exercise to solicit the views of the members and City staff regarding their concerns and aspirations for Cheyenne. This initial dialogue will inform our approach to the planning process and ensure that issues important to the City are identified on the front end.

Step 1 Deliverables

- Project data and information request
- Confirmed project schedule and work program

Step 2: Upfront Public Engagement

Anticipating a high level of participation from an active and engaged community, our proposed outreach process for the Comprehensive Plan Update includes both traditional (face-to-face) and innovative web-based activities. Outreach summaries will be prepared for each public engagement activity.

2a. Internet-based Public Engagement

The Project Team is committed to using the internet to maximize the participation and communication between the City and its residents. We understand that all online engagement for the Comprehensive Plan Update will be conducted through the City's Connect Cheyenne platform, built on PublicInput, and that no independent project website will be created. The City will provide the Project Team with administrative access to the designated project pages, with any features outside those pages coordinated with City staff. The Project Team will work with the City to post meeting dates; display draft documents; address frequently asked questions; provide an online community survey, and host map.social as a link or button on Connect Cheyenne.

Online Community Survey

The Project Team will prepare an online community survey for the residents and business owners of Cheyenne to offer a community-wide opinion on a range of topics and issues. The Project Team will provide the survey language to load into the Connect Cheyenne platform. The business component of the survey will include the opportunity to provide specific input on those issues and concerns most important to the City's business community. At the close of the survey, the Project Team will review and summarize results in the Existing Conditions Memorandum as a gauge of community issues and key themes.

map.social (Online Map-Based Engagement Platform)

The Project Team will work with City staff to host map.social (via link or website button), a web-based community issues mapping tool, on the Connect Cheyenne platform. Developed by Houseal Lavigne, this tool allows users to identify, map, and comment on geographic areas of concern and valued City amenities. map.social simplifies the mapping process and familiarizes users with all areas of the City in a manner that is intuitive, interactive, and effective. Input from users allows us to create a composite map of Cheyenne issues to assist with the establishment of Comprehensive Plan Update goals and policies.

2b. Key Stakeholder Interviews and Focus Groups (up to 16 sessions)

Confidential interviews/focus group discussions (two to four participants each) will be conducted to obtain additional information regarding local issues and opportunities. The Project Team will work with City staff and elected officials to identify those individuals or groups to be interviewed. The Project Team recommends a broad sampling of interviewees who may possess unique perspectives or special insights into the community. Interviewees could include selected property owners, new or lifelong residents, local business owners, school district officials, the City commissions, developers, HOA representatives, service providers, economic development entities and local nonprofits, and relevant taxing bodies and government agencies. Examples of potential interviewees could include representatives from Laramie County, the Cheyenne MPO, F.E. Warren Air Force Base, and the VA Hospital. The interviews and focus group discussions will be conducted in person during scheduled visits related to other outreach events or via web meeting during a specific scheduled day for such activities.

2c. DIY Kits

The Project Team will make DIY workshop kits available to City staff, as well as community groups (e.g., partner organizations, homeowners associations, places of worship, community organizations, neighborhood groups) throughout the City. DIY workshop kits allow City staff and residents to facilitate their own workshops and gather input from specific segments of the population that may not otherwise participate in more formal planning activities. City staff will play a key role in helping distribute DIY workshop materials to target groups and then provide summary information to the Project Team. DIY Workshops can either be conducted by staff or volunteers as in-person events or hosted online using a small group virtual event format such as Zoom or Microsoft Teams. Houseal Lavigne will summarize the results of up to 15 DIY kits.

2d. Business Community Workshop

This workshop will be targeted specifically to business owners and managers, developers, and Cheyenne's corporate citizens as an important stakeholder group. The purpose of the workshop is to establish a dialogue and obtain feedback from those members of the business community that have a unique insight and perspective, and whose assistance and involvement is crucial to the Comprehensive Plan Update's ultimate success. The workshop will be scheduled to coincide with other in-person engagement activities and can be conducted in the morning to minimize impacts on business owners or can be scheduled as part of a regularly scheduled event where numerous property owners and business owners are typically in attendance.

2e. Community Kick-off Open House Event

The Project Team will collaborate with City staff to host an engaging, community-wide event, welcoming all residents and stakeholders to participate in kicking off the process to shape the City's future. This event aims to educate and inspire participants of all ages to get involved and take ownership of the planning process. The format will feature a range of activities in an open-house setting, offering an interactive overview of the planning process, and gathering insights into community strengths, challenges, and opportunities. Activities will include live polling/word cloud creation, post-it board exercises to gather input on key issues, opportunities, and priority projects, a dot-map exercise, and a map.social training session with an interactive booth.

Attendance from members of City Council, Planning Commission, other City commissions, and the Steering Committee is encouraged to demonstrate support for the planning process.

2f. Pop-Up Event

The Project Team will prepare for and attend one pop-up event scheduled to coincide with another planned in-person project visit. The event will be coordinated with City staff during a scheduled trip aligning with Step 4: Plan Visioning or Step 5: Draft Comprehensive Plan Update phases. The event may be held in conjunction with an existing community event or activity and will be used to gather additional input or feedback relevant to the planning process.

The Project Team will also prepare reusable outreach materials, which may include flyers, posters, postcards, maps, comment cards, and idea boards, for City staff to facilitate additional staff-led pop-up events throughout the planning process. City staff will be responsible for selecting, coordinating, and staffing any additional pop-up events and providing the resulting input to the Project Team for consideration.

2g. Public Engagement Key Themes and Takeaways Summary

This step will conclude with a summary of key themes and takeaways from initial public engagement tools and events. This input will serve as the cornerstone of our consensus-building process and provide focus and direction for the subsequent Comprehensive Plan Update recommendations. The Public Engagement Key Themes and Takeaways Summary will be incorporated into the Existing Conditions Memorandum.

Step 2 Deliverables

- Connect Cheyenne project-page content
- Online Community Survey language
- map.social online engagement tool and compiled mapping results
- DIY workshop kits (PDF)
- Reusable pop-up outreach materials (delivery dependent on phase of project when pop-up event is deployed)
- Summaries of completed engagement activities; compiled as the Public Engagement Key Themes and Takeaways Summary

Step 3: Existing Conditions

The existing conditions assessment step will provide a foundational understanding of the issues and opportunities to be addressed in the Comprehensive Plan Update.

3a. Existing Conditions Assessment

The existing conditions assessment will be based on issues and opportunities identified in outreach, past plans and studies, information provided by the City and partner agencies, feedback from community service providers, and field work conducted by the Project Team. We intend to move through this task efficiently, reserving project budget and resources for visioning, planning, and action.

Relevant Past Plans, Studies and Reports

This task will include an assessment of relevant past plans, studies, and policies to build on the City's previous planning efforts and initiatives. Documents anticipated for review include the following materials identified in the RFP, as available and prioritized in coordination with City staff:

- Cheyenne Area On-Street Bicycle Plan and Greenway Plan Update (2012)
- Unified Development Code, as amended (2012)
- PlanCheyenne Comprehensive Plan (2014)
- City of Cheyenne Community Development Processes and Permitting Best Practices Review (2015)
- Downtown Development Authority Plan of Development (2024)
- Parks and Recreation Master Plan (2025)
- Cheyenne MPO Future Land Use and Transportation Network (2025)
- Community Climate Action Plan (2026)
- Airport Master Plan (Estimated completion Summer of 2026)
- Cheyenne MPO corridor studies
- Community survey data collected by City staff related to land use, development, and community transportation preferences

This review will identify recently adopted City projects and policies to be incorporated into the new Comprehensive Plan Update. The Project Team will coordinate with City staff to identify additional relevant local and regional studies that should serve as a baseline and inform the existing conditions assessment.

Demographic Profile

This task will include a demographic analysis of the Cheyenne community that will include an analysis of trends in population, households, income, age, labor force, employment and economic conditions. This task will be undertaken using available information from current American Community Survey (ACS) data, Esri, and data provided by City staff.

Existing Land Use and Development, including Barriers and Opportunities Map

This task will include an inventory of existing land uses and development patterns in Cheyenne using the City's GIS data, aerial imagery, and field work. Existing land use issues and opportunities will be presented and assessed in this section. An **Existing Land Use Map** will be prepared alongside a **Barriers and Opportunities Map** that broadly identifies areas where existing conditions may constrain development, as well as locations offering opportunities for infill, redevelopment, improved connectivity, infrastructure investment, and future growth. The map will be based on available data, background plans, field observations, agency coordination, and community input.

Current Zoning Ordinance and Development Regulations

This task will include a review of the City's current zoning and subdivision regulations to evaluate their consistency with existing land use patterns and potential areas of change.

Transportation, including Mobile Device Location Data Collection and Analysis.

Mead & Hunt will lead a comprehensive inventory and analysis of Cheyenne's multimodal transportation system to establish a clear, data-driven understanding of existing conditions, planned investments, and future growth pressures. The effort will evaluate roadway classifications, traffic volumes, commuting patterns, freight corridors, rail crossings, and system performance, with attention to growth related to annexation, data centers, and Sentinel workforce demands. The study will also inventory bicycle, pedestrian, transit, and airport connectivity; review street design standards and Complete Streets alignment; map planned transportation improvements; and assess crash patterns and high-injury corridors to identify multimodal safety priorities and connectivity opportunities across the community.

Mobile Device Location Data Collection and Analysis. Given the relationship of Cheyenne to other Front Range communities and the large proportion of residents who commute out and into the City every day, the City's function as a regional hub at the convergence of I-25 and I-80, and increased traffic associated with the Sentinel Project, analysis of large mobility (e.g. big datasets) can be helpful in understanding current travel patterns and the long-term impacts of new industrial and residential developments, and potential travel behavior changes (e.g. route shifts, mode shifts). Mead & Hunt will use probe-based or census-based data sources (e.g. Replica HQ, and publicly available regional travel models) to evaluate mobility trends in the City as well as surrounding region (e.g. Sentinel, Laramie, Fort Collins and other Front Range destinations). This includes data obtained through Mead and Hunt's existing Replica License; no additional data purchases are anticipated. Specific pattern insights will include major origins and destinations, commute sheds/ employee/ employer origin-destination, trip purpose, trip length, mode choice, trip maker demographics, destination trip/ visitation levels, trip diurnal distribution to inform the Land Use and Development, Economic Development, and Transportation elements of the Comprehensive Plan. This analysis will be included as a section with the Existing Conditions Memorandum.

Services, Infrastructure, and Community Facilities

The Project Team will assess existing service, infrastructure, and community-facility conditions at a level appropriate to support Comprehensive Plan policies and implementation recommendations.

Public Safety. The assessment will review available information regarding police, fire, emergency-response facilities, service areas, and anticipated service considerations associated with future growth and development. The task will rely on information provided by the City and relevant service providers and will not constitute a detailed staffing, facility, or emergency-response master plan.

Utilities and Infrastructure. Mead & Hunt will lead a high-level assessment of available information regarding water, wastewater, stormwater, utility service areas, outside-user connections, system capacity, and planned infrastructure investments. The assessment will identify major infrastructure considerations related to annexation, residential growth, industrial development, data centers, and other large users. Infrastructure and utility demands from data centers will be considered as an input for Land Use Scenario development in Step 4c. Detailed engineering, utility modeling, and facility design are not included.

Parks, Recreation, Education, and Community Facilities. The Project Team will inventory existing parks, recreation facilities, open spaces, educational facilities, and other community facilities using available City and partner-agency information. The assessment will identify major service gaps, coordination considerations, and future planning needs at a policy level. A detailed park service-area, facility-capacity, or equitable-access study is not included in the base scope.

Environmental Conditions. The assessment will review available information regarding environmental conditions that may affect future land use and development, including flood risk and other relevant environmental constraints. The Project Team will also review long-term cemetery planning considerations identified by the City.

Arts, Culture, and Historic Resources. The Project Team will inventory relevant arts and cultural resources, historic properties and districts, and existing historic-preservation initiatives. The assessment will identify policy and coordination considerations for protecting and supporting these resources.

Intergovernmental and Interagency Coordination

The Project Team will assess internal City coordination and coordination with Laramie County, the Cheyenne MPO, relevant state agencies, F.E. Warren Air Force Base, the Cheyenne VA Medical Center, nonprofit organizations, economic-development entities, and other partner agencies. The assessment will identify coordination needs related to future land use, transportation, utilities, infrastructure, public services, regional development, and plan implementation.

3b. Existing Conditions Memorandum

The Existing Conditions Memorandum will be based on issues and opportunities collected during outreach, information compiled after reviewing past plans and studies, information provided by the City and partner agencies, feedback from community service providers, and field work conducted by the Project Team. The Existing Conditions Memorandum is not intended to be a long-form report. The Memorandum will be a concise interim document that establishes a baseline understanding of the Cheyenne community. We intend to move through this task efficiently, reserving project budget and resources for visioning, planning, and action.

3c. Staff Review – Review Existing Conditions

The Project Team will meet with City staff to review and discuss the Existing Conditions Memorandum. The Project Team will work to ensure that substantive comments provided by City staff are addressed before meeting with the public in the Plan Visioning phase. This meeting will be a conference call/Teams meeting with City staff.

3d. Steering Committee Virtual Meeting – Review Existing Conditions (Mtg #2)

The Project Team will meet with and present the Existing Conditions Memorandum to the Steering Committee to gather feedback and input. This will be scheduled as a virtual Teams meeting.

Step 3 Deliverables

Existing Conditions Memorandum, including:

- Demographic profile
- Land use and development assessment, including the Existing Land Use Map and Barriers and Opportunities Map
- Zoning and development-regulation review
- Transportation and mobility analysis
- Services, infrastructure, and community-facilities assessment
- Intergovernmental coordination assessment

Step 4: Plan Visioning and Land Use Scenario Development

Based on the previous steps in the planning process, the Project Team will prepare the Vision Statement and Goals, develop and evaluate up to three Land Use Scenarios, and identify a Preferred Land Use Scenario to guide preparation of the Draft Comprehensive Plan Update.

4a. Community Visioning Workshop

The community visioning workshop will allow residents and stakeholders to tell us what they think, before plans and recommendations are crafted. The community visioning workshop will involve the Project Team, City staff, elected and appointed officials, Planning Commission members, and community stakeholders and residents.

The workshop will begin with a brief presentation providing an overview of the planning process, major themes and takeaways from the Public Engagement Key Themes and Takeaways Summary and the Existing Conditions Memorandum, and directions for the visioning exercise. Participants will then break into small groups for a mapping exercise where they will put pen to paper and work to develop their “vision” for the future of the community. The workshop will conclude with general agreement regarding the community’s issues and opportunities, key planning themes and principles, and projects and improvements that will be desirable in the future.

4b. Vision Statement and Goals

The Comprehensive Plan Update needs to establish an overall “vision statement” for the future of Cheyenne that can provide focus and direction with goals based on analysis and themes identified during community outreach. Following the community visioning workshop, the Project Team will summarize all feedback received during the previous steps of the planning process and prepare a vision statement for the Cheyenne Comprehensive Plan Update. The vision statement will be prepared using feedback from the community visioning workshop, community outreach activities, and observations garnered from the Existing Conditions Memorandum. As part of the task, the Project Team will develop goals to provide more specific focus and direction for planning recommendations.

4c. Land Use Scenario Development (Three Scenarios)

The Project Team will develop up to three alternative land use scenarios and work with City staff and the Steering Committee to evaluate them and select a preferred scenario serve as the basis for the CheyenneNext Comprehensive Plan.

The scenarios will reflect adopted plans, existing regulations, current development patterns, and other ongoing planning studies. The Project Team will begin by working with City staff to identify areas of the community that may be appropriate for future growth, redevelopment, or other change. The City and Project Team will also identify key measures for comparing the scenarios, such as future population, number of households, and number of jobs.

These measures will be estimated using current development trends, demographic data, GIS information, and other available datasets. The Project Team will map and analyze each scenario to confirm that it represents a realistic pattern of future development.

Potential Revenue Generation Analysis

As part of the land use scenario development, this analysis allows the City and Steering Committee to compare the scenarios based not only on population, households, and jobs, but also on their relative potential to generate property tax and sales tax revenue for the City. This analysis will provide planning-level estimates intended to compare the scenarios and support decision-making.

Estimate of property tax revenue. The Project Team will use parcel-level information from the Laramie County Assessor to calculate the average assessed value per acre for different land use types. These values will then be applied to the land uses shown in each scenario to estimate the total assessed value of development under that scenario. The City’s mill levy will be applied to estimate the resulting property tax revenue received by the City.

Estimate of sales tax revenue. The Project Team will estimate taxable sales for different commercial and retail land uses. These estimates will be based on sales-per-square-foot assumptions developed with the City’s Economic Development Director and taxable sales data from the Wyoming Department of Revenue. The City’s share of sales tax revenue will then be applied to estimate the revenue generated under each scenario.

This analysis will provide planning-level estimates intended to compare the scenarios and support decision-making and will focus on potential revenue. The analysis will rely on available data and will inform policies addressing data center siting, infrastructure investment, residential land preservation, and long-term fiscal sustainability. Preparation of a detailed cost-of-services or net fiscal impact analysis is not included.

Preferred Land Use Scenario

The alternative Land Use Scenarios and their accompanying analysis will be presented to the Steering Committee for review and discussion. This will include the key performance indicators developed for each scenario including population, households, jobs, and potential revenue generated of each scenario. Together, these measures will allow the Steering Committee to weigh the Land Use Scenarios not only on how they shape growth and community character, but on their relative capacity to support the City's fiscal position. Based on this discussion, a Preferred Land Use Scenario will be selected to serve as the basis for preparing the Draft Comprehensive Plan Update elements and recommendations as part of Step 5.

4d. Staff Review – Vision and Land Use Scenarios

The Project Team will meet with City staff to review and discuss the Vision Statement, Goals, and Land Use Scenarios. Comments provided by City staff will be integrated into a revised set of deliverables for Steering Committee review. This meeting will be a conference call/Teams meeting with City staff.

4e. Steering Committee Virtual Meeting – Visioning Feedback Session (Mtg #3)

The Project Team will meet with and present the Vision Statement, Goals, and the Land Use Scenarios to the Steering Committee to gather feedback and input and select a Preferred Land Use Scenario. This will be scheduled as a virtual Teams meeting.

Step 4 Deliverables

- Draft Vision Statement and Goals
- Up to three Land Use Scenarios, including scenario performance indicators for population, households, and jobs
- Potential Revenue Generation Analysis
- Preferred Land Use Scenario

Step 5: Draft Comprehensive Plan Update

This step will focus on preparing draft City-wide policies and recommendations for the core elements of the Comprehensive Plan Update. The draft Comprehensive Plan Update prepared in this step will reflect the revised Vision Statement, Goals, and Preferred Land Use Scenario developed in previous steps of the planning process.

5a. Draft Comprehensive Plan Update Elements

We will prepare the Draft Comprehensive Plan Update using input obtained during the previous steps of the project. The draft Comprehensive Plan Update will be well-organized and user-friendly, highly illustrative, and visually compelling rather than being too heavy on narrative. Concise, well-written text will be combined with attractive and easy-to-understand maps, graphics, illustrations, and photos to effectively communicate the draft Comprehensive Plan Update's policies and recommendations. The following sections will be developed as part of the draft Comprehensive Plan Update:

Introduction and Context

This section will include the introduction for the Comprehensive Plan Update, describing how to use it and how the Plan was created. It will also summarize components from the Existing Conditions Memorandum, including the regional context and study area. Additional content may include concise summaries of relevant past plans, studies and reports; a demographic profile snapshot; and abbreviated summaries of public engagement events along with key themes and takeaways. This will be a concise section meant to set the foundation for the Comprehensive Plan Update's policies and recommendations.

Vision and Goals

This section will include the revised Vision and Goals that will serve as a framework for decision-making, resource allocation, and policy development. This section will inform and integrate the following Plan sections to collectively achieve the community's vision for the future.

Land Use and Development

This section will include policies and recommendations for all land use areas in the City and its planning area, including residential neighborhoods, commercial areas, medical, open space, natural environment, and public and semi-public uses. This section will identify and address a range of land use topics such as desired development patterns, new growth areas, potential annexation opportunities, land use compatibility issues, commercial and mixed-use development, and conservation areas. This section will include the **Recommended Future Land Use Map** (based on the Preferred Land Use Scenario).

Housing and Neighborhoods – Residential Areas

This section will provide policies and recommendations for maintaining and improving Cheyenne's established neighborhoods while supporting housing supply, affordability, diversity, and reinvestment. Recommendations will address infill development, residential land capacity, neighborhood compatibility, and a range of housing types, including missing-middle, multifamily, mixed-use, manufactured, and other attainable housing options needed to serve current residents and anticipated workforce and population growth. The Project Team will review the City's current housing initiatives and recently completed housing-demand and growth analyses to determine whether changing conditions or updated information warrant modifications to existing assumptions or policy direction. Recommendations will align housing and land use policies with housing demand, affordability, workforce growth, infrastructure availability, and long-term residential land needs.

The section will consider applicable federal and state housing legislation in effect during preparation of the Plan, including the 21st Century ROADS to Housing Act, where relevant to local land use regulations, development processes, housing production, neighborhood reinvestment, funding opportunities, and Comprehensive Plan implementation.

Economic Development – Commercial and Employment Areas

This section will focus on the City's commercial areas providing policies and recommendations designed to strengthen employment, job creation, business attraction and retention, and to provide and grow a diverse and thriving tax base for the City. This section will provide high-level recommendations for the City's commercial areas.

Data Center and Large-Footprint Technology Development. Based on the Land Use Scenario analysis, this subsection will establish policies and considerations for data centers and other large-footprint technology uses. Recommendations will address land suitability, compatibility with residential and sensitive land uses, infrastructure requirements, buffering and site-design practices, and preservation of land needed for long-term residential and community growth. The Project Team will prepare a **Technology and Residential Growth Suitability Map** to evaluate the relationship between large-footprint technology development and future residential growth. Using available data, the map will identify broad areas that may be suitable for data centers and similar technology uses, areas that should be prioritized or preserved for residential growth, and potential conflict or transition areas where technology development could consume land needed for housing or create compatibility, infrastructure, noise, traffic, or buffering concerns.

Transportation

Building on existing conditions analysis and community input, Mead & Hunt will lead the development of the Transportation chapter, translating findings into actionable goals, policies, and implementation strategies. The chapter will address multimodal connectivity, roadway function and capacity, active transportation improvements, and Safe Systems-based safety policies. Recommendations will support connections between neighborhoods, employment centers, downtown, the Greenway, F.E. Warren Air Force Base, and Cheyenne Regional Airport while addressing growth pressures from annexation, data centers, and regional growth trends. The chapter will include clear, user-friendly goals, policies, and action steps identifying priorities, responsible parties, timing, and potential funding opportunities.

As part of the development of the Transportation element, the Project Team will produce an updated **Recommended Greenway Master Plan Map** and a **Recommended Bicycle Master Plan Map** that will supersede the 2012 plans. These will be produced as standalone documents that can either be included in the Transportation chapter in the final CheyenneNext Comprehensive Plan Update or appended to the plan.

Services, Infrastructure, and Community Facilities

This element will provide policy-level recommendations addressing public services, infrastructure, and community facilities needed to support existing development and future growth.

Public Safety. Recommendations will address police, fire, emergency services, service areas, facility coordination, and growth-related service considerations.

Utilities and Infrastructure. Recommendations will address water, wastewater, stormwater, utilities, outside-user connections, infrastructure capacity, development-related improvements, and coordination of infrastructure investment with land-use planning.

Parks, Recreation, and Community Facilities. Recommendations will address parks, recreation, open space, community facilities, arts and cultural resources, historic preservation, and cemetery planning.

Environmental Conditions. Recommendations will address relevant environmental conditions and constraints, including flood risk, resource conservation, and applicable policies identified through the City's Community Climate Action Plan and other adopted plans.

Intergovernmental and Interagency Coordination. This subsection will provide recommendations for coordination among City departments and with Laramie County, the Cheyenne MPO, state and federal agencies, F.E. Warren Air Force Base, the Cheyenne VA Medical Center, service providers, nonprofit organizations, economic-development entities, and other partner organizations.

Preliminary Implementation Strategy

The Comprehensive Plan Update will include a practical and actionable implementation strategy necessary to bring the Plan's goals, policies, and strategies to fruition. The implementation strategy will include general administration procedures, a list of potential funding sources, implementation methods, and potential zoning and regulatory actions (as needed).

5b. Staff Review – Draft Comprehensive Plan Update

The draft Comprehensive Plan Update will be delivered to City staff for review and comment. Appropriate revisions will be made prior to publishing the draft Comprehensive Plan Update for public review. This meeting will be a conference call/Teams meeting with City staff.

5c. Steering Committee Meeting – Draft Comprehensive Plan Update (Mtg #4)

The Project Team will meet with the Steering Committee to review and discuss the draft Comprehensive Plan Update, including preliminary policies, plan recommendations, and initial draft maps and graphics. Appropriate revisions will be made as part of the revised Comprehensive Plan Update document in the next step.

Step 5 Deliverables

Draft Comprehensive Plan Update including Housing and Neighborhoods – Residential Areas; Economic Development – Commercial and Employment Areas; Transportation; Services, Infrastructure, and Community Facilities; Preliminary Implementation Strategy; and the following maps:

- Recommended Future Land Use Map and supporting Barriers and Opportunities Map
- Technology and Residential Growth Suitability Map
- Recommended Greenway Master Plan Map
- Recommended Bicycle Master Plan Map

Step 6: Revised and Final Comprehensive Plan Update

Based on the previous steps in the planning process, the draft and final version of the Comprehensive Plan Update will be prepared for review, consideration, and adoption.

6a. Revised Draft Comprehensive Plan Update Document

Based on feedback received in previous steps the Project Team will prepare the revised Comprehensive Plan Update. The revised Comprehensive Plan Update will be user-friendly, highly illustrative, and visually compelling.

Revised Implementation Strategy – Action Matrix

The revised Comprehensive Plan Update will include an Action Matrix that with key implementation actions, priority improvement projects, short-, medium- and long-range strategies, potential funding sources, responsible parties, and measurable outcomes. The Action Matrix will serve as a checklist to track implementation progress necessary to realize the vision and goals outlined in the Comprehensive Plan Update.

Zoning Audit

The Zoning Audit will include potential regulatory changes and procedures to be implemented after adopting the Comprehensive Plan Update. The Zoning Audit can be incorporated into the Implementation chapter or be a standalone Memorandum. This is a critical first step in understanding what changes need to be made in the City's Zoning Ordinance to implement the Comprehensive Plan Update policies and recommendations.

6b. Staff Review – Revised Draft Comprehensive Plan Update

The Project Team will submit the revised draft Comprehensive Plan Update to City staff for internal review. Appropriate revisions will be made prior to the community open house and presentation to the Planning Commission.

6c. Community Open House – Revised Draft Comprehensive Plan Update

The community open house will be held to give residents an opportunity to drop in, review the revised draft Comprehensive Plan Update, and ask questions of the Project Team and City staff in an open house format. The open house will provide an opportunity to see and learn about the City's revised draft Comprehensive Plan Update before the adoption process begins. Open house presentation materials and collateral will be provided so that City staff can facilitate additional informational meetings as needed. Following the community open house, the final Comprehensive Plan Update will be prepared for the public hearing presentation and the adoption process.

6d. Final Comprehensive Plan Update to Planning Commission – Public Hearing

The Project Team will present the final Comprehensive Plan Update to the Planning Commission at a public hearing. Based on review and discussion and public feedback during the public hearing, the final Comprehensive Plan Update will be presented to City Council for adoption.

6e. Final Comprehensive Plan Update to City Council – For Adoption

The Project Team will present the final Comprehensive Plan Update to the City Council for consideration and adoption. Presentation materials that incorporate plan revisions will be provided to City staff to conduct any additional adoption meetings required by the City of Cheyenne.

6f. Final Comprehensive Plan Update Document

Following the presentations to the Planning Commission and City Council, the Project Team will work with City staff to prepare the final Comprehensive Plan Update document. The Project Team will provide the Existing Conditions Memorandum and final Comprehensive Plan Update in an editable PDF format. The Project Team will provide survey data (excel or PDFs), outreach summaries (PDFs), and GIS data compiled during the planning process (geodatabase or shapefile). Completeness of GIS will be dependent on several factors including the quality of GIS data provided by the City, direction provided by City staff during the project kick-off meeting, and the level of GIS work conducted by the Project Team during the planning project.

Step 6 Deliverables

- Revised Draft Comprehensive Plan Update, including the Action Matrix
- Zoning Audit, either within the Implementation chapter or as a standalone memorandum
- Community Open House presentation materials and collateral
- Planning Commission and City Council presentations and materials
- Final Comprehensive Plan Update final document
- Close-out project information, including the Existing Conditions Memorandum, Survey data in Excel or PDF format, Public-outreach summaries in PDF format, GIS data in geodatabase or shapefile format

Fee Schedule

Project Budget

The maximum cost for the project is a **not-to-exceed \$351,790** for the CheyenneNext Comprehensive Plan Update assignment, including all professional fees and project direct expenses. Directly related job expenses include: travel (typically including airfare, mileage, car rental, staff per diem for meals and incidentals, and lodging), printing, graphic reproduction, mailing, and other out-of-pocket expenses that are related to carrying out services under this scope and agreement.

Fee by Step	Cost
Step 1: Project Kick-off	\$ 24,980
Step 2: Upfront Public Engagement	\$ 25,875
Step 3: Existing Conditions	\$ 85,480
Step 4: Plan Visioning and Land Use Scenario Development	\$ 66,435
Step 5: Draft Comprehensive Plan Update	\$ 93,010
Step 6: Revised and Final Comprehensive Plan Update	\$ 41,010
Total Professional Fees	\$ 336,790
Total Direct Expenses	\$ 15,000
Total Not-to-exceed	\$ 351,790

Houseal Lavigne Hourly Rates And Per Diem Schedule

This Hourly Rates and Per Diem Schedule will be updated at the beginning of every calendar year.

Houseal Lavigne Hourly Rates

Partner	\$305
Principal	\$295
Practice Lead	\$245
Senior Project Manager/Analyst	\$200
Project Manager	\$170-\$190
Planner II/Analyst II	\$140-\$160
Planner I/Analyst I	\$120-\$130
Clerical/Technical	\$90

Houseal Lavigne Per Diem

Full Day	\$65
----------	------

Anticipated Project Timeline

The anticipated project timeline may shift based on the scheduling of outreach events and activities, coordinate on public meetings, and to coordinate staff review and Steering Committee review. Any schedule adjustments will be made in consultation with City staff to maintain project momentum.
