MEMO

TO: Honorable Mayor and members of the City Council

FROM: Charles W. Bloom, AICP

SUBJECT: DDA Plan of Development Public Hearing

DATE: February 10, 2025

The purpose of this public hearing is to solicit public feedback in compliance with Wyo. Stat. §15-9-208(c) on the plan of development for the downtown development area.

The updated Plan of Development (Plan) has been completed, incorporating and expanding on elements of the 1991 plan and its amendments from 1993, 2006, 2016, and 2018 into a new single, comprehensive document. In addition to this consolidation, the update incorporates new ideas and initiatives identified through public outreach sessions, ensuring the plan reflects current community priorities and opportunities. Included in this process was a thorough review of the prior plans and other area plans to remove redundant, completed, or no longer necessary goals to streamline the plan for greater clarity and focus.

The Plan process also featured robust public engagement including three online questionnaires to gather community input and two in-person visioning events to discuss the downtown and plans. Two work sessions were held for property and business owners, and one joint work session brought together the Downtown Development Authority (DDA) Board and Planning Commission for discussion and understanding of the process for adoption of the Plan. Community participation was further encouraged through three in-person events (Friday's on the Plaza, local eateries, and Superday) to identify public preference and two draft plan open houses. The process also included opportunities for public comment at DDA meetings and an opportunity for final comment at a joint meeting of the DDA Board and Planning Commission on January 21, 2025. Throughout the process the draft plan has been made available for public comments on the DDA's Plan website.

The Plan is available online here: <https://plan.konveio.com/cheyenne-dda-plan-development-adoption-draft>. A brief presentation will be made at the Public Hearing.
