
MEMORANDUM

TO: Mayor Patrick Collins, and City Council
FROM: TJ Barttelbort, Purchasing Manager 
DATE: December 3, 2025
SUBJECT: Consideration to Purchase between the City of Cheyenne, and Motorola Solutions, for Ten (10) Motorola Mobile Radios for the Cheyenne Police Department

Consideration to Purchase between the City of Cheyenne, and Motorola Solutions, for Ten (10) Motorola Mobile Radios for the Cheyenne Police Department.

The Cheyenne Police Department recently ordered ten (10) new police interceptors, and this Consideration to Purchase will supply the new interceptors with the required radios.

This is a Sole Source purchase directly from Motorola, therefore no quotes were requested.

The total amount of the purchase is \$82,615.90

Funding: 021-26-2613-41-43102 (1% Sales Tax 23-26 / Equipment)

REQUEST FOR SOLE/SINGLE SOURCE PURCHASE

DIRECTIONS:

Complete this form for all purchase requests with a sole/single source vendor. Send to the Purchasing Office before purchasing the item(s) along with the letter from the vendor indicating they are the sole/single supplier. **If over \$74,999.99, attach a copy of the legal ad and place on council.**

Name: Shannon Keslar

Date: 11/3/2025

Division/Department: Cheyenne Police Department

ITEM DESCRIPTION: Ten each Motorola APX8500 All Band High Power Mobile Radios, Model #M37TXS9PW1CN
For use in Cheyenne Police Department vehicles

AMOUNT OF PURCHASE: \$82,615.90

STATE REASON FOR SOLE OR SINGLE SOURCE PURCHASE (CIRCLE ONE):

Motorola is the sole source provider of these mobile radios as Motorola has guaranteed compatibility with the radio
communications set-up that is utilized in Cheyenne-Laramie County. The entire radio communications installation has been
built around compatibility with the Motorola platform, which includes Wyolink. Motorola Solutions is the main regional dealer.

Signature of Requesting Individual: Shannon Keslar

DIVISION/DEPARTMENT HEAD APPROVAL:

Name: [Signature]

Date: 11/5/25

COMMENTS: _____

For Purchasing Office use only:

Sole/Single Source Letter Attached: Yes No / NA

Legal Ad Attached: Yes No / NA

Finance Dates: 12/17/2025

City Council Dates: 12/8/2025 & 12/22/2025

Received On: 12/3/2025 TJ B

REQUEST TO PURCHASE OVER \$75,000.00

Consideration to Purchase between the City of Cheyenne, and Motorola Solutions, for Ten (10) Motorola Mobile Radios for the Cheyenne Police Department. The total amount of the purchase is \$82,615.90. This is a single source purchase, therefore no bids were requested.

This will be reviewed by the City Council Finance Committee on December 16, 2025 and voted on at the December 22, 2025 City Council meeting.

MOTOROLA

November 3, 2025

Shannon Keslar
City Of Cheyenne Police Department
415 W. 18th Street
Cheyenne, WY 82001

This document will serve as basis and justification to City of Cheyenne Police Department for sole source purchase of Motorola Project 25 compliant two-way portable radios, mobile radios and desk top console radios.

In 2006 the State of Wyoming selected Motorola's ASTRO 25 offering as the vendor for the State radio system, WyoLink. This decision was made for a number of reasons, including superior coverage, performance, and a host of value added subscriber radio features above and beyond the minimum requirements supported within the Project 25 standards. There are unique parameters associated with the Motorola radios that differentiate their portfolio of subscriber radio products from other vendors in the market. These parameters are described in detail below.

Audio Performance

Motorola employs very aggressive ambient noise suppression technology on its radios that consistently outperforms noise suppression techniques demonstrated by its competitors. The superiority of the Motorola noise suppression technologies has been substantiated through independent testing conducted by the South Metro Fire Dept. in Colorado. (Contact information available upon request)

Coverage Performance

The WyoLink system is optimized for operation with Motorola P25 radios. Other vendor radios will not experience the same quality of coverage performance due to demonstrated superior radio performance specifications designed and manufactured into the Motorola radios.

Radio Specifications

Motorola radios have consistently demonstrated best in class performance in all critical measures of radio performance including audio output, receiver sensitivity, frequency stability, selectivity, intermodulation, spurious response, FM hum and noise and audio distortion. These performance characteristics have direct impact on clarity of audio quality and radio coverage performance. Other vendor radios with poorer performance specifications will offer the City less usable coverage from the radio system and poorer audio clarity to radio users.

Value Added Features

In addition to the baseline set of features required by the Project 25 standard, Motorola has developed additional features on its ASTRO 25 network to further improve the operational impact and value of their mission critical radio network. Many of these features are unique to Motorola and would not be 100% compatible with other manufacturer's subscriber radios. This includes the emergency notification feature, which is designed to work with the WyoLink system through Motorola's MCC7500 consoles, which the City of Sheridan currently uses.

Operability, Usability and Durability

Motorola's mobile and portable P25 radios are built on common platforms, making the end user experience common across any radio tier or configuration. For example, the user interface software provides commonality of operation across radios so that each feature is executed via the same step(s) on each radio. Button, knobs, rotary controls, soft keys and programmable keys initiate the same function on each radio. This means total knowledge transfer to the end user regardless of which radio the user is issued. Other manufacturers have not developed this "common platform" operation across their subscriber portfolios.

System Security

All Motorola subscriber units on the State Radio system may be provisioned through the use of an Advanced System Key for programming access to the network. Non-Motorola manufactured subscriber radios do not employ this Advanced System key – and some vendors require no system key at all to program. Only Motorola subscribers can provide the continuation of this System Key Security Management. Introducing subscribers that do not utilize a system key on to the system irreversibly breaches the established system programming security that has been in place by WyoLink for several years.

User Training

The City of Cheyenne is serviced by Bear Communications, which is a Motorola certified and supported vendor. All training on new radios and operations of Motorola equipment is handled by a qualified, trained technician from either BearCom or directly from a Motorola factory representative.

Maintenance and Support

The City of Cheyenne Police Department can manage one contract with Motorola for any necessary service and support. Introducing other vendor equipment into this mix will require additional training of staff on the maintenance of other vendor equipment. The City will incur additional ongoing operational costs to service and maintain other vendor equipment.

Spares and Accessories

The City can maintain an inventory of spare radios, batteries, antennas and user accessories such as battery chargers, speaker microphones and carrying cases unique to its Motorola fleet of radios. Many of these spares and accessories are interchangeable. Introducing other vendor radios into the fleet will require an additional inventory of spares and accessories. The City will incur additional ongoing capital and operational expenses to maintain additional spares and accessories as these components are not interchangeable between Motorola and other brand manufacturers.

Future Capabilities

Radio technology should offer built in software enhancement capability through upgrades and expansion of capabilities through hardware and software. Motorola's newest generation of radios offers this functionality with memory expansion and an available option board slot in its APX line of radios. This offers room for future capabilities such as Project 25 TDMA operation in these radios, or hardware based enhancements such as secure Bluetooth headset operation. The APX line is the only line of radios shipping on the market currently offering this future enabled technology leadership.

Very truly yours,
MOTOROLA SOLUTIONS, INC.
