

RESOLUTION NO. _____

ENTITLED: "A RESOLUTION OPPOSING FEDERAL LEGISLATION OR REGULATIONS THAT INCREASE MAXIMUM TRUCK SIZE OR WEIGHT LIMITS ON NATIONAL HIGHWAYS."

WHEREAS, the City of Cheyenne recognizes the critical role that freight transportation plays in supporting Wyoming's economy, interstate commerce, and the movement of goods throughout the United States;

WHEREAS, the City of Cheyenne is committed to maintaining a safe, efficient, and fiscally responsible transportation system for residents, businesses, visitors, emergency responders, and the goods movement industry alike;

WHEREAS, proposals have been introduced in Congress from time to time to increase the allowable weight or size of commercial motor vehicles operating on the National Highway System, including proposals to increase the federal gross vehicle weight limit from 80,000 pounds to 91,000 pounds;

WHEREAS, heavier commercial vehicles would place additional stress on roads, bridges, intersections, and other transportation infrastructure that was not originally designed for substantially greater vehicle weights;

WHEREAS, local governments are responsible for maintaining significant portions of the transportation network used daily by commercial trucks, and increased infrastructure deterioration resulting from heavier trucks would create additional maintenance and replacement costs without a dedicated federal funding source;

WHEREAS, commercial trucks travel billions of miles annually on local roads, and communities such as Cheyenne experience substantial truck traffic that is vital to commerce but also contributes to ongoing infrastructure maintenance needs;

WHEREAS, winter weather conditions, wind-gusts, steep grades, and periodic traffic congestion in and around Cheyenne already create operational and public safety challenges involving commercial vehicles;

WHEREAS, the U.S. Department of Transportation has previously reported higher crash involvement rates for trucks weighing between 91,000 and 97,000 pounds compared to today's federally permitted 80,000-pound trucks, and has found that longer combination vehicles require greater stopping distances and experience higher out-of-service violation rates;

WHEREAS, the City of Cheyenne believes any proposal to increase truck size or weight should fully account for its impacts on public safety, local infrastructure, and taxpayer costs before being considered by Congress; and

WHEREAS, protecting the safety of Cheyenne residents, preserving public infrastructure, and avoiding unfunded federal mandates are fundamental responsibilities of the City.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the City of Cheyenne formally opposes federal legislation or administrative action that would increase the allowable size or weight of commercial motor vehicles operating on the National Highway System unless and until it can be demonstrated that such increases will not adversely impact public safety, local infrastructure, or impose additional unfunded costs on state and local governments;

BE IT FURTHER RESOLVED, that the City encourages Congress to preserve existing federal truck size and weight limits and to reject proposals that would authorize heavier or larger commercial vehicles without comprehensive safety analysis and dedicated funding to address resulting infrastructure impacts; and

BE IT FINALLY RESOLVED, that the City Clerk is directed to transmit copies of this Resolution to:

- Wyoming's Congressional Delegation;
- The Governor of Wyoming;
- The Wyoming Department of Transportation;
- The Wyoming Association of Municipalities; and
- Other appropriate federal and state officials.

PRESENTED, READ AND ADOPTED this _____ day of _____, 2026.

Patrick Collins, Mayor

(SEAL)

ATTEST:

Kylie Soden, City Clerk
