

RESOLUTION NO. _____

ENTITLED: “A RESOLUTION APPROVING THE BUDGET OF THE CHEYENNE REGIONAL AIRPORT BOARD FOR THE FISCAL YEAR BEGINNING JULY 1, 2026, AND ENDING JUNE 30, 2027.”

WHEREAS, the Cheyenne Regional Airport Board ("Board") was created pursuant to Ordinance No. 2407, adopted by the Governing Body on February 11, 1980, as amended;

WHEREAS, City Code Section 2.60.050(B) requires that the Board submit, on or before the May 1st of each year, a proposed budget for the ensuing fiscal year to the governing bodies of the City and the County;

WHEREAS, City Code Section 2.60.050(B) further provides that the Board’s budget shall be subject to alteration, modification, and approval by the Governing Body in accordance with City policies; and

WHEREAS, on April 9, 2026, the Board approved its proposed budget for the fiscal year beginning July 1, 2026, and ending June 30, 2027; and

WHEREAS, City staff have reviewed the proposed budget submitted by the Board.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING, that the proposed budget of the Cheyenne Regional Airport Board for the fiscal year beginning July 1, 2026, and ending June 30, 2027, as set forth in the document attached hereto and incorporated herein by reference as “Cheyenne Regional Airport Operating Budget FY 2027,” in the total amount of thirteen million four hundred two thousand thirty-six dollars (\$13,402,036.00), is hereby approved.

PRESENTED, READ AND ADOPTED this _____ day of _____, 2026.

Patrick Collins, Mayor

(SEAL)

Background

The following pages present the Cheyenne Regional Airport Board's operating budget for fiscal year 2027. The Board consists of five members, two members appointed by the City of Cheyenne, two members appointed by Laramie County, and one member appointed by the City and County in alternating terms. The Joint Powers Agreement sets forth the terms by which the City, County, and Airport operate. Under this agreement, the City and County annually review the Airport Budget. The City and County also sign all FAA grant agreements as co-sponsors. The Board operates under the authority of both an Airport Board under Wyoming State Statute and as a Joint Powers Board and holds ownership of all facilities, equipment, lease holdings, and operating rights.

The Board adopted a Certificate of Organization on July 1, 1980, pursuant to the City of Cheyenne Ordinance 2407 and Laramie County Commissioners Resolution officially forming the Airport Board and electing officers under W.S. § 10-4-101 through 10-4-107. Under W.S. § 16-1-104(d), the Airport Board was deemed a joint powers board.

For the year January 1, 2026 – December 31, 2026, the slate of officers is: Kim Brokaw, President; Kevin Paintner, Vice President; Bradley Ray, Treasurer; Dr. Jeff Storey, Secretary; and Garry Chadwick, Member.

The Board's fiscal year is from July 1 – June 30 each year. Once the Board approves the budget it is submitted to the City of Cheyenne and Laramie County for review by May 1st of each year.

The Board operates the Airport as a business enterprise to be financially self-sufficient. The Airport does not have the authority to tax and does not use local tax dollars, property tax or sales tax. The Airport is funded through fees paid by airport users, including airlines and businesses that operate at the airport.

Community/Economic Impacts

The airport is a key piece of infrastructure for our community, connecting citizens and employers to the country and globally. The airport supports not just passenger travel, but also the Wyoming Air National Guard and the State of Wyoming, among many other consumers. According to the [Wyoming 2020 Aviation Economic Impact Study](#), Cheyenne Regional Airport's commercial air services and airport activities provide over \$27.5 million in annual economic activity to the community, including \$4.98 million for business tenants. Wyoming airports provide over 20,000 jobs. An updated impact study will be available later this year.

Additionally, Wyoming airports have approximately 3,628 business tenants across the state. Included in the amount are the approximate 70 tenants at the Cheyenne Regional Airport including:

- Land leases to approximately 21 various tenants including the Wyoming Air National Guard, the Wyoming Department of Transportation, and the City of Cheyenne.

- Hangar rentals for 14 tenants including Alpine Air, the Flying School, and Reach Air Medical Services.
- Commercial leases to 52 tenants including various doctors, dentists, the US Postal Service, DFS, and WYDOT Aeronautics.

Cheyenne Regional Airport Board Budget Summary

Impacts

Air Service

In 2025, the Airport saw its largest numbers with 27,076 passengers departing out of the terminal and 25,571 passengers arriving to Cheyenne. We do not anticipate any disruptions to air service and will continue to work with the airlines to bring additional flights to the community.

Summary

This year we are presenting the budget with two enterprise centers. The enterprise centers include Airport Administration and Operations and Fixed Based Operations (FBO). Revenues and expenses for the various enterprise centers and their associated cost centers are outlined in the following pages.

Presented on pages 4-6 is a chart summarizing the Airport Board's total budget for the fiscal year 2027 (July 1, 2026-June 30, 2027). We are expected to have net operating income of \$563,451 with a net loss of \$375,767, including all capital expenses.

The blue color indicates that it is an amount received/paid by the Airport. The orange color indicates amounts received/paid using other funds such as 6th penny funds, Wyoming Air National Guard, federal, and state grants.

Airport Administration and Operations

The Airport's operating budget is a stand-alone enterprise center separate from FBO operations. All revenues generated from the operation of this enterprise center, including rents, commercial landing fees (other than FBO landing fees), and other operating fees, will be used to offset the expenses related to airport operations. This budget year, the airport will use Airport reserves for operating/capital expenses in excess of revenues.

The income (loss) from airport operations for FY 2027 is anticipated to be \$288,612. The specific details for the airport administration and operations enterprise center are outlined on pages 7-10. The Airport's capital plan can be found on page 13.

Revenue

Aeronautical revenues are collected from both the fixed base operator and the airlines, as well as other aeronautical users of the airport. Non-aeronautical revenues are collected from a variety of sources including terminal concessions, rental cars, and lease revenue. These revenue streams are used to fund cost-center expenses. There are five revenue centers for airport administration and operations including air carriers, leased space, rental cars, concessions, and other income. The total amount of revenue expected to be collected by Administration and Operations is \$3,301,158. A more detailed review of the anticipated revenues and sources for each of these profit centers is below.

Air Carriers

Air Carrier income is derived from three sources: landing fees, terminal rents, and Passenger Facility Charges (PFC). Landing fees and terminal rent revenues are used to offset expenses related to the airfield and terminal operations. PFC revenues are used to reimburse the Airport for approved projects previously completed.

Air Carrier revenue is estimated to be \$252,147 for fiscal year 2027. Of this, \$64,056 is terminal space rental, \$55,878 is landing fees, and \$132,213 are PFC's.

Leased Space

The Airport currently has approximately 70 leases with various tenants including the Wyoming Department of Transportation (WYDOT), Wyoming Air National Guard (WANG), the City of Cheyenne, and the State of Wyoming. The leased space includes building rent, land rent, hangar rent (excluding community hangar), terminal rent (excluding rental cars and air carriers), and storage rent. The leased space revenue is used to offset the expenses in the "Leased Space" cost center.

The budget does include a 3% annual increase in rent for inflation, but this may vary as we are unsure what the Consumer Price Index (CPI) will be during FY 2027. Leased space revenue for fiscal year 2027 is anticipated to be \$2,684,383.

Rental Cars

Rental car revenue is predominantly composed of minimum annual guaranteed amounts (MAGs). The on-airport rental car companies are required to pay 10% of gross revenue or their MAG, whichever is higher. This is included in the concession revenues below.

The rental cars also pay rent for space in the terminal, which is used to offset expenses in the “Terminal” cost center. The rental cars pay rent and utility costs for the use of the wash bay facility. These fees help to offset the cost of operating the wash bay which is included in the “Leased Space” cost center. The amount of rent revenue from rental cars for fiscal year 2027 is anticipated to be \$12,614.

The third type of rental car revenue is Customer Facility Charges (CFC) which are collected and held to offset rental car-related approved projects. This revenue is anticipated to be \$89,156. The rental car revenue for fiscal year 2027 is anticipated to be \$101,770, excluding the concessions.

Concessions

Usually, most of the income from concessions is received from restaurant revenue. At this time, the restaurant is still within its first year of operation, so no restaurant concessions have been incorporated into this budget. Other concession revenue includes rental car concessions, ATM concessions, vending machine concessions, and ride-share concessions.

All concession revenue is dependent on activity level and is hard to predict depending on market fluctuations. The concession revenue stream helps to fund the “Terminal” cost center. Revenue is budgeted to be \$181,169 for fiscal year 2027.

Other Income

Other income includes interest income, advertising income, and other airport revenue such as badging fees. The budgeted amount for fiscal year 2027 is \$81,690.

Expenses

Budgeted expenses for airport administration and operations total \$2,989,546.

Operating expenses exclude FBO expenses and capital expenses, as those are reflected in separate budgets on pages 11-12 following the detailed cost center information.

The number of full-time equivalent staff for Airport administration and operations (non-FBO) employees is currently 13. Incorporated into the budget for both administration/operations and FBO is a 5% raise for all full-time employees which will ultimately vary from 2.5% to 5% depending on their annual employee evaluation.

The administration is currently conducting a salary survey to help provide guidance on wages in the future. Finally, there is a 5% adjustment, for both administration/operations and FBO, for employer-provided benefits excluding health insurance which is anticipated to increase 10% for FY 27 unless employees change from their current selection (i.e. individual or family) in the course of the year.

We increased our budget for IT hardware to incorporate the purchase of new computers that are hitting their life cycle. We also increased employee training and travel expenses as we have several new employees who would benefit from additional training.

There are five direct cost centers for the Airport: Administration, airfield, leased space, other buildings and grounds, and terminal. There are 16 corresponding expense categories. The expense categories include areas such as personnel expenses, utilities and building expenses, operations and maintenance expenses, and equipment expenses.

Administration and Operations Cost Center

This cost center includes all administrative and operations expenses that were not specifically assigned to another cost center. This also includes expenses related to administrative and operations staff expenses.

Airfield Cost Center

This cost center includes the costs associated with the airfield and air carrier apron including snow removal, aircraft rescue firefighting, operations and maintenance expenses, and utilities expenses. This cost center is offset by revenues collected by Air Carriers.

Leased Space Cost Center

This cost center includes all expenses related to our leased property. This cost center also includes the airport-owned hangars, the rental car wash bays as well as aeronautical and non-aeronautical tenants. This cost center is offset by revenues collected by the Rental Cars and Leased Space revenue centers.

Terminal

Included in the terminal cost center are all costs associated with the terminal building including repair and maintenance, custodial, utilities, the parking lot, baggage system and certain security items related to access control (cameras, doors, alarms). This cost center is offset by revenues collected by Air Carriers, Rental Cars, and Concessions revenue centers.

Other Buildings and Grounds

This cost center includes the expenses associated with other grounds at the airport including the parks and grassy areas as well as roadways at the Airport.

Airport Fixed Based Operations (FBO) FY 2027 Budget

The Fixed Based Operations (FBO) operates as a separate enterprise center. It is anticipated that for FY 2027, the FBO would have a total net gain of \$289,609.

Revenues		FY 2027 Budget
Fuel Revenues		\$ 2,554,661
FBO Services		\$ 115,718
Community Hangar/Ramp Fee		\$ 196,891
Misc. FBO Sales		\$ (30)
Fuel Flow Fees		\$ 140,014
State Fuel Tax		\$ 40,065
Total FBO Revenue		\$ 3,047,319
Expenses		
Personnel Services (Payroll)		\$ 637,283
Repairs and Maintenance		\$ 17,774
Utilities		\$ 34,680
Supplies and Products		\$ 11,706
Fuel and Purchases for Resale		\$ 1,776,869
Miscellaneous		\$ 72,798
Total FBO Expenses		\$ 2,551,111
Net FBO Operating Income (Loss)		\$ 496,208
Capital Expenses		\$ 206,600
Net FBO Income (Loss)		\$ 289,609

Revenues

The FBO has the following revenue centers: Fuel sales (Jet A, Avgas, Military, Other), FBO services, and miscellaneous revenue.

Revenues for the FBO are hard to predict due to the past several years being inconsistent and fuel prices on the rise. For a conservative estimate, we averaged the last two years and decreased fuel sales and FBO services by approximately 20%.

Expenses

The FBO has the same cost centers as the Administration and Operations enterprise center. The FBO has seven full-time employees and two part-time employees. Fuel costs are based on an average of FY25 and FY26 expenses. Unfortunately, this is extremely hard to predict as we are unsure what fuel prices will be in the upcoming year.

Airport Capital FY 2027 Budget

Capital expenses such as airfield equipment purchases and airfield construction costs are typically funded through the Capital Improvement Program (CIP). Capital funds include the Federal Airport Improvement Program (AIP), state grant funds, Passenger Facility Charges (PFCs), and rental car Customer Facility Charges (CFCs). All the proposed projects for FY 2027 are detailed below.

	Total	Federal	State (WYDOT)	Other	Airport
ADMINISTRATION					
AIRFIELD					
Seal Coat & Mark Pavements, Rubber Removal	545,471		490,924		54,547

TERMINAL					
TOTAL	7,752,819	5,700,000	903,424	50,000	1,099,395

Cash Balance Forecast

As of February 28, 2026, the Board had \$3,879,754 in cash accounts. Factoring in the remaining estimated revenues and expenses for FY 2026, the remaining cash balance as of July 1st is estimated to be \$3,331,123. As indicated in the overall budget on page 6, approximately \$402,548 will need to come from reserves for FY 2027. Of that amount, \$373,611 is required to be paid for capital projects for our local match.

Currently, the Airport has an outstanding debt service with the Wyoming State Lands and Investment Board that is being repaid using lease revenue, and the yearly payment is included in the budgeted non-operating expenses.

If using available cash reserves, the projected remaining cash balance at the end of FY 2027 would be \$2,928,575.
