**MEMORANDUM**

**TO:** Mayor Patrick Collins, and City Council  
**FROM:** TJ Barttelbort, Purchasing Manager   
**DATE:** May 6, 2026  
**SUBJECT:** Consideration to Purchase between the City of Cheyenne, and Shannon Chastain Enterprises, Inc. d/b/a Basic Equipment, for a 240VT Split Drum Vibratory Roller with Tow Package for the Street & Alley Division

Consideration to Purchase between the City of Cheyenne, and Shannon Chastain Enterprises, Inc. d/b/a Basic Equipment, for the purchase of a 240VT Split Drum Vibratory Roller with Tow Package.

This is a single source purchase, therefore no bids were requested. Basic Equipment is the sole manufacturer and reseller of this unique piece of equipment

The total amount of the purchase is \$99,985.00

Funding: 020-26-2616-42-43102 (1% Sales Tax 19-22 / Equipment)  
\$99,985.00

## REQUEST FOR SOLE/SINGLE SOURCE PURCHASE

### DIRECTIONS:

Complete this form for all purchase requests with a sole/single source vendor. Send to the Purchasing Office before purchasing the item(s) along with the letter from the vendor indicating they are the sole/single supplier. **If over \$34,999.99, attach a copy of the legal ad and place on council.**

RE: **Sole Source Supplier** for a BASIC EQUIPMENT 240VT 2-4 Ton Split Drum Vibratory Roller W/ Tow Package

SCE, INC., Trademark" BASIC EQUIPMENT", to the best of our knowledge, is a sole source manufacturer for a 2-4 Ton Split Drum Vibratory Roller with a Tow Package option which is designed specifically for asphalt road patch repairs. The model number of this machine is the 240VT.

The uniqueness of this machine is that it can be safely towed directly behind the "haul truck" carrying the asphalt mix needed to make asphalt patch repairs without the need for an additional "tow trailer" or chains and other load binding equipment to secure the machine to the trailer during transport. This allows the "patch crew" the ability to drive up to any repair site, then quickly disconnect from the haul truck using onboard hydraulics built into the 240VT roller. This fast and efficient concept eliminates the need to unchain, unload a machine from a trailer, then safely secure the trailer in an "out of the way location" before being able to begin the patch repair. The tow trailer transport method can be very dangerous while loading and unloading the equipment and it is extremely inefficient as well compared to the tow package concept.

Key features of the 240VT tow package

- Tongue can be hydraulically raised and lowered from the operator's station.
- Tongue assembly is removable to provide additional clearance when working in tight locations or when the machine is not being used for tow purposes.
- Tow wheels can be independently hydraulically raised and lowered from the operator's station.
- ALL hydraulic tow cylinders are equipped with mechanical safety stops to provide additional safety against hydraulic failures when the 240VT roller is in tow mode.
- Front steering drum is equipped with an oscillation lock pin system to prevent "swaying" of the front drum assembly while the machine is in tow mode.
- Tow package is equipped with all necessary DOT approved hitch devices, safety chains, trailer electrical plug, break-away switch, electric brakes and LED turn signals.
- The 240VT shall be equipped and shipped with the hitch type (2-5/16" ball hitch or pintle hitch) and trailer electrical plug style of the customers choosing to provide for easy integration of the 240VT into the customers established tow fleet standards. (Customer must specify with order)
- Max tow speed of the 240VT roller is 45MPH for safe operation.

At BASIC EQUIPMENT, we strive to produce a top-quality machine that provides the safest, most versatile and efficient method for completing asphalt patch repairs and asphalt compaction in standard asphalt paving operations.

Shannon Chastain, President  
BASIC Equipment  
Eatonton, GA 31024
