MEMO

To: Honorable Mayor Patrick Collins and Members of the City Council
From: Seth Lloyd, AICP
Subject: PLTA-26-4 / Amending Section 6.2.8 of the UDC – relevant to Parking Design
Date: October 12, 2026

Background:
The item for consideration is a UDC Text Amendment. This is approved by Ordinance.

The proposed Governing Body review schedule is as follows:

- Introduction and Referral 10/12/2026
- Public Services Committee 10/19/2026
- Second reading 10/26/2026
- Public Services Committee 11/2/2026
- Third and final reading 11/9/2026

Planning Commission Recommendation:
The Planning Commission heard this item at their meeting on October 5, 2026 and recommended approval of the amendments (by a vote of 3-2).

The Staff Report sent to the Planning Commission is attached and has not been modified.

Public Comment
As of the creation of this memo (October 7, 2026), Staff has received multiple inquires and comments from the public related to the proposed amendment. The four Ordinances combined have received 1,098 views on the PublicInput page and 10 comments, most of the comments were directed at other amendments, but at least 2 of the comments were directed at this amendment. Comments received prior to Planning Commission are included in the Planning Commission Staff Report, and other comments received at or after Planning Commission are attached after the Staff Report.

APPROVED as to form only:
By John Brodie at 3:24 pm, Oct 6, 2026

ORDINANCE NO. _____

ENTITLED: "AN ORDINANCE AMENDING SECTION 6.2.8 OF THE CHEYENNE UNIFIED DEVELOPMENT CODE TO ALLOW FOR UNPAVED PARKING IN CERTAIN SITE-SPECIFIC SITUATIONS."

BE IT ORDAINED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING:

Section 1. That the Governing Body of the City of Cheyenne finds that the text amendment that is the subject of this ordinance meets the criteria specified in Section 2.4.1.d of the Unified Development Code of the City of Cheyenne (UDC).

Section 2. That on October 5, 2026, the Planning Commission conducted a public hearing, reviewed the proposed text amendment, and recommended approval of said text amendment.

Section 3. That Section 6.2.8.a.5 of the UDC is amended to read as follows, with Section 6.2.8, as amended, set forth in its entirety in Exhibit A, which is attached hereto and incorporated herein:

6.2.8 Parking Design

a. ***Location, Size and Landscape Requirements.*** All on-site parking shall be broken into smaller "parking blocks" and include landscape design according to the following Table 6-5. Specific zoning districts or design standards may further limit the general size and location of on-site parking spaces and parking blocks.

5. *Exceptions.*

(a) The Director may approve exceptions to these design and location standards for lots under 10 spaces where:

~~(a)~~(1) It is reasonably necessary to accommodate infill development;

~~(b)~~(2) There has been no recent investment and is no anticipated investment in the public streetscape that will be negatively impacted by the proposed alternative location and design; and

~~(c)~~(3) The exception presents the least deviation from the standards necessary, and otherwise furthers the design objectives of this section.

(b) The Director may approve exceptions to the design and location standards of this subsection for unpaved parking areas through the Administrative Adjustment process of this Code.

b. ***Dimensional Requirements.***

Table 6-6: Parking Stall Dimensions and Layout							
Parking Angle / Width ~~(A)~~	***Width Parallel to Aisle (~~K~~A)***	***Depth to Wall (C)***	***Depth to Interlock (E)***	***Aisle Width* (D)***	***Module** (F, G, H)***		***Bumper Overhang (typical) (I)***

90° / 9.0’***	9.0’	18.5’	18.5’	26’	63’	63’	2.5’
90° / 9.5’***	9.5’	18.5’	18.5’	25’	62’	62’	2.5’

* Measured between ends of stall lines.
** Rounded to the nearest foot.
*** For back-in parking, aisle width may be reduced 4.0’.

c. ***Grading and Surfacing*** All parking, circulation and loading areas shall be graded for proper drainage and be paved, unless specified otherwise in these regulations. The maximum grade shall not exceed 8%. The maximum desirable grade in any direction is 5%. Notwithstanding the surfacing requirement above, gravel or compacted aggregate surfacing may be used in lieu of paved surfacing in the following circumstances, subject to approval by the Director. Alternative surfaced areas shall be required to pave ADA spaces and accesses onto a public right-of-way in accordance with Article 4. The Director may not approve gravel surfacing if deemed inconsistent with the development standards or character of the surrounding area.

1. Agricultural Uses. Parking areas associated with agricultural operations, including farm stands, agritourism uses, and working farms, where the parking area serves as an accessory use to the agricultural activity and is located on property used predominantly for agricultural purposes.

2. Single Family Residential. Parking areas associated with Detached, Semi-attached, Attached Dwellings and related Accessory Dwelling Units.

3. Low-Usage or Overflow Parking. Overflow or supplemental parking areas serving low-frequency uses where peak demand occurs fewer than fifty-five (55) times per year, including but not limited to overflow parking for Civic Uses, Entertainment venues, Outdoor Recreation Facilities, parks, open space, trailheads, and similar outdoor and assembly uses.

4. Regional Stormwater Management. Parking areas where the applicant demonstrates, to the satisfaction of the City Engineer, that installation of impervious paved surfaces would

adversely affect regional stormwater conveyance, groundwater recharge, or compliance with an adopted stormwater management plan. Such a demonstration shall be made through a site-specific stormwater analysis prepared by a licensed engineer, identifying the adverse impacts and explaining how gravel surfacing mitigates or avoids those impacts.

d. ***Parking Area Maintenance.*** The responsibility for the maintenance of parking areas provided for use by the general public, customers, or employees shall lie with the property owner and/or their agents. All parking areas and accessways, whether paved or surfaced with gravel or compacted aggregate, shall be permanently maintained in good and safe condition to prevent damage to vehicles, minimize or eliminate tripping hazards, and maintain ADA accessibility and, whenever necessary, be repaired to ensure continued compliance with the standards of this Code. Maintenance shall include patching cracks and sealcoating paved surfaces; filling potholes, grading uneven surfaces, recompacting compacted aggregate surfaces, repairing pavement depressions and uneven surfaces; and maintaining drainage flow, drainage conveyance methods, and drainage infrastructure. All parking area striping, directional arrows, and parking-related signage shall be maintained in a manner that they remain clearly visible. Maintenance shall also include maintenance of parking lot landscaping required under this Code, parking lot lighting, and keeping parking areas free and clear of weeds, junk, and nuisances.

Section 4. Sections, paragraphs, sentences, clauses, and phrases of this ordinance are severable. If any section, paragraph, sentence, clause, or phrase of this ordinance is declared unconstitutional or otherwise unlawful, such declaration shall not affect any of the remaining sections, paragraphs, sentences, clauses, and phrases.

Section 5. This ordinance shall be in full force and effect upon approval and publication.

EXHIBIT A
Changes to UDC 6.2.8 in context

6.2.8 Parking Design

a. Location, Size and Landscape Requirements. All on-site parking shall be broken into smaller "parking blocks" and include landscape design according to the following Table 6-5. Specific zoning districts or design standards may further limit the general size and location of on-site parking spaces and parking blocks.

Table 6-5: Parking Location, Size and Landscape Requirements			
	Front	***Side***	***Rear***
250+ spaces	Must be broken into smaller parking blocks.*	Must be broken into smaller parking blocks.*	5% internal landscape; AND 8' perimeter buffer
151 to 250 spaces	10% internal landscape; AND 12' perimeter buffer	8% internal landscape; AND 10' perimeter buffer	5% internal landscape; AND 8' perimeter buffer
101 to 150	8% internal landscape; AND 10' perimeter buffer	5% internal landscape; AND 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer
31 to 100 spaces	5% internal landscape; AND 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer	No requirement
30 and under spaces	5% internal landscape; OR 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer	No requirement

* Where individual sites require or provide parking requirements larger than the maximum size, parking lots shall be broken into "parking blocks" meeting the size, location, and landscape requirements of this table.

1. *Perimeter Buffer Standards.* Perimeter landscape buffers shall be continuous around the parking block except at vehicle access points or any portion of the parking block that is bordered by buildings. The buffer shall include landscape materials meeting the requirements of Section 6.3. Where the landscape setback required by 6.3.3 is larger than the perimeter parking buffer required by Table 6-5, the greater buffer shall apply. Where perimeter landscape buffers include sidewalks meeting the internal pedestrian circulation requirements, the width of the sidewalk shall be added to the minimum required width for the perimeter buffer. Where parking blocks are located adjacent to one another, they may share the perimeter buffer along the common boundary provided it includes a pedestrian facility.
2. *Internal Landscape Standards.* Internal landscape area shall be provided as a percentage of the parking area, exclusive of drive aisles, as specified in Table 6-5. Internal landscape area shall be surrounded by raised curbs or other approved edge treatment that infiltrates stormwater, and shall include landscape materials meeting the requirements of Section 6.3. Internal landscape areas shall be allocated as end caps to parking aisles, as intermediate islands within aisles, or as buffer strips between aisles. All internal landscape areas shall be at least 8' wide in all dimensions, and shall be no less than 150 square feet in area.

Where internal landscape areas include sidewalks meeting the internal pedestrian circulation requirements, the width of the sidewalk shall be excluded from the area calculation of the internal landscape area. Internal landscape islands shall include one large canopy tree per every 150 square feet, which may contribute to the tree points required by Section 6.3.4.

3. *Limitations in the Pedestrian Districts.* In the NB, MUR, and MUB districts, the following additional design standards and limitations shall apply:
   (a) No individual on-site parking shall be located within 20' of the front lot line unless it is located to the side of a building as provided in sub-section b;
   (b) Parking may be located to the side of the building in a limited manner provided:
      (1) the lot includes no more than 20 spaces at the side of the building;
      (2) the lot provides no more than two rows of spaces served by a single drive aisle, and is otherwise limited in width along the streetscape to the greatest extent possible; and
      (3) it is screened from the streetscape by a 2.5' to 4' decorative fence or wall matching the materials and architectural style of the building, and extended at the front building line.
      (c) Shared or public parking, or common "parking blocks" may be located along a street provided that the lot is no larger than 100 spaces, has a 8' perimeter buffer, and is screened from the street by a 2.5' to 4' decorative fence or landscape screen.

4. *Limitations in Residential Districts.* In all residential districts, where parking lots over 15 spaces are required for any use, the following additional design standards and limitations shall apply:
   (a) The parking area shall be setback behind the front building line or at least 30' from the front lot line, whichever is greater.
   (b) All parking areas shall have an 8' perimeter buffer used to screen the area from adjacent residential uses.
   (c) Individual parking blocks shall be no larger than 50 spaces for any one use.

5. *Exceptions.*
   (a) The Director may approve exceptions to these design and location standards for lots under 10 spaces where:
      ~~(a)~~(1) It is reasonably necessary to accommodate infill development;
      ~~(b)~~(2) There has been no recent investment and is no anticipated investment in the public streetscape that will be negatively impacted by the proposed alternative location and design; and
      ~~(c)~~(3) The exception presents the least deviation from the standards necessary, and otherwise furthers the design objectives of this section.
   (b) The Director may approve exceptions to the design and location standards of this subsection for unpaved parking areas through the Administrative Adjustment process of this Code.

b. Dimensional Requirements.

Table 6-6: Parking Stall Dimensions and Layout							
Parking Angle / Width ~~(A)~~	***Width Parallel to Aisle (~~K~~A)***	***Depth to Wall (C)***	***Depth to Interlock (E)***	***Aisle Width* (D)***	***Module** (F, G, H)***		***Bumper Overhang (typical) (I)***

90° / 9.5'***	9.5'	18.5'	18.5'	25'	62'	62'	2.5'

* Measured between ends of stall lines.
** Rounded to the nearest foot.
*** For back-in parking, aisle width may be reduced 4.0'.

c. ***Grading and Surfacing.*** All parking, circulation and loading areas shall be graded for proper drainage and be paved, unless specified otherwise in these regulations. The maximum grade shall not exceed 8%. The maximum desirable grade in any direction is 5%. Notwithstanding the surfacing requirement above, gravel or compacted aggregate surfacing may be used in lieu of paved surfacing in the following circumstances, subject to approval by the Director. Alternative surfaced areas shall be required to pave ADA spaces and accesses onto a public right-of-way in accordance with Article 4. The Director may not approve gravel surfacing if deemed inconsistent with the development standards or character of the surrounding area.

1. Agricultural Uses. Parking areas associated with agricultural operations, including farm stands, agritourism uses, and working farms, where the parking area serves as an accessory use to the agricultural activity and is located on property used predominantly for agricultural purposes.
2. Single Family Residential. Parking areas associated with Detached, Semi-attached, Attached Dwellings and related Accessory Dwelling Units.
3. Low-Usage or Overflow Parking. Overflow or supplemental parking areas serving low-frequency uses where peak demand occurs fewer than fifty-five (55) times per year, including but not limited to overflow parking for Civic Uses, Entertainment venues, Outdoor Recreation Facilities, parks, open space, trailheads, and similar outdoor and assembly uses.
4. Regional Stormwater Management. Parking areas where the applicant demonstrates, to the satisfaction of the City Engineer, that installation of impervious paved surfaces would adversely affect regional stormwater conveyance, groundwater recharge, or compliance with an adopted stormwater management plan. Such a demonstration shall be made through

a site-specific stormwater analysis prepared by a licensed engineer, identifying the adverse impacts and explaining how gravel surfacing mitigates or avoids those impacts.

d. ***Parking Area Maintenance.*** The responsibility for the maintenance of parking areas provided for use by the general public, customers, or employees shall lie with the property owner and/or their agents. All parking areas and accessways, whether paved or surfaced with gravel or compacted aggregate, shall be permanently maintained in good and safe condition to prevent damage to vehicles, minimize or eliminate tripping hazards, and maintain ADA accessibility and, whenever necessary, be repaired to ensure continued compliance with the standards of this Code. Maintenance shall include patching cracks and sealcoating paved surfaces; filling potholes, grading uneven surfaces, recompacting compacted aggregate surfaces, repairing pavement depressions and uneven surfaces; and maintaining drainage flow, drainage conveyance methods, and drainage infrastructure. All parking area striping, directional arrows, and parking-related signage shall be maintained in a manner that they remain clearly visible. Maintenance shall also include maintenance of parking lot landscaping required under this Code, parking lot lighting, and keeping parking areas free and clear of weeds, junk, and nuisances.

CITY OF CHEYENNE
PLANNING & DEVELOPMENT

CITY OF CHEYENNE PLANNING COMMISSION
OCTOBER 5, 2026
STAFF REPORT

REQUEST:	Text Amendments amending the Unified Development Code (UDC) amending 1.4.3 Defined Terms, 1.4.4 Descriptions of Uses of Land and Buildings; 2.2.3 Site Plan, 5.1.4 Districts and Uses, 5.7.2 Home Occupations, and 6.2.8 Parking Design
CASE NUMBER:	PLTA-26-4
PURPOSE:	Amendments to clarify use allowances relating to agricultural uses and when certain applications are required; and amendments to modify parking design standards to allow gravel parking.
PREPARED BY:	Seth Lloyd, AICP, Senior Planner

RECOMMENDED MOTIONS:

Move to recommend the Governing Body approve text amendments to the Unified Development Code amending UDC sections 1.4.3 Defined Terms, 1.4.4 Descriptions of Uses of Land and Buildings; 2.2.3 Site Plan, 5.1.4 Districts and Uses, and 5.7.2 Home Occupations as outlined in this staff report and recommended by staff, noting the amendments meet the review criteria of UDC 2.4.1.d.

Move to recommend the Governing Body approve text amendments to the Unified Development Code amending UDC section 6.2.8 Parking Design as outlined in this staff report and recommended by staff, noting the amendments meet the review criteria of UDC 2.4.1.d.

BACKGROUND:

This item was deferred to the October 5, 2026 Planning Commission meeting due to lack of a quorum at the September 21, 2026 Planning Commission meeting. In the interim, the City reviewed regulations regarding "animal unit" and have made minor edits to that definition. The remainder of the Staff Report and proposed amendments to the UDC are unchanged from the September 21, 2026 Staff Report.

The City's Unified Development Code (UDC) was adopted by the Governing Body on January 23, 2012, by Ordinance Number 3943 with an effective date of April 30, 2012. The Unified Development Code is the regulatory document carrying out the vision of PlanCheyenne and is reviewed annually pursuant to UDC 1.1.7 [Annual Review Requirement] to determine if any particular standard or regulation is timely, relevant and adequately addresses current market conditions.

In the annexing of various County pockets, City Staff was made aware of some concerns relating to City and municipal code relevant to agricultural uses. Some of these concerns seemed broadly applicable to all agricultural uses in the City limits – not just those being annexed. The City has already amended the municipal code ordinance around allowed grass height to recognize grazed and natural properties are different from landscaped areas.
The City now proposes four ordinances to further update and clarify codes relevant to agricultural uses. Two of these are municipal code only and will not be heard by the Planning Commission: changes to electrical fences in municipal code and changes to livestock regulations in municipal code. The other two would amend the UDC and are contained within this staff report. Staff is requesting two separate motions as the two amendments serve different purposes (though they are related).

The first ordinance amends various aspects of the UDC around agricultural uses. This amendment would change the UDC's defined terms and use definitions - and add the proposed new uses to the use table in the agricultural section. The UDC was adopted in 2012, but the State of Wyoming amended state rules around small-scale agriculture after the UDC adoption. As such, the UDC's definition and use allowance for 'Limited Agriculture' is out-of-date and needs to be overhauled. In addition this change and minor clarifications on other agricultural uses, Staff proposes adding an 'Agrotourism' use and a 'Concentrated Feeding Operations and Slaughterhouses' use. The former use would have likely had to been classified as a commercial use, but commercial uses are largely prohibited in agricultural zones. The latter use is specifically referenced as an exemption to the 'General Agriculture' category but nowhere else mentioned in the UDC. A request for this use would have likely been categorized in the 'Industrial' category or, more likely, would have triggered UDC 1.4.4's provision to go through the text amendment process for a use that does not really fit in any of the use categories. The use table is proposed to be updated for the new and clarified uses.

The first amendment also clarifies what uses would need a site plan. Generally, staff has not required a site plan for general agricultural uses such as the introduction of grazing to a property, but technically the UDC would require a site plan in that scenario. Along with updating the site plan exemptions for agricultural uses, the amendment proposes removing the site plan requirement for certain other uses, many of which currently do not truly go through the full site plan process.

The second amendment proposes allowing parking lots to be gravel in City limits. Currently all parking lots in the City are required to be paved, with no exceptions.

PROPOSED AMENDMENTS:

Summary: 1.4.3 Defined Terms
Three definitions are proposed to be added to the UDC. These definitions would be used with the proposed code amendments. All three of these proposed definitions would be added in alphabetical order in UDC 1.4.3 Defined Terms.

> *Animal Unit.* Animal unit (AU) is a standardized unit of measurement used to determine livestock density. One (1.0) Animal Unit shall be determined in accordance with the animal-unit

equivalencies set forth below, regardless of individual live animal weight. For any animal or poultry species not expressly listed above, the Director shall determine the appropriate Animal Unit classification based on the mature size and characteristics of the species:

1. Large Livestock (beef or dairy cattle, horses, and mules): 1.0 per animal
2. Medium Livestock (swine, sheep, goats, and alpacas): 0.20 per animal
3. Small Livestock and Poultry (chickens, turkeys, ducks, and rabbits): 0.02 per animal.

Incidental Cleaning and Processing. The incidental slaughtering, cleaning, field dressing, or processing of animals for personal consumption, including fish, wild game harvested through lawful hunting, or livestock raised on-site.

Personal or Non-Commercial Harvest. The customary, non-commercial harvesting, slaughtering, or processing of livestock as an accessory use to a primary residential or standard agricultural operation.

Summary: 1.4.4 Descriptions of Uses of Land and Buildings

A review of Agricultural uses resulted in one use proposed to be removed, three uses added, and other uses edited to reflect current uses and trends. With various amendments at the state level, the use category 'Limited Agriculture' was deemed not appropriate and has been replaced by a smaller-scale use entitled 'Gardens and Homemade Foods' with much more permissiveness (see edits to the Use Table – Section 5.1.4). Proposed changes to 1.4.4.h Agricultural Uses are below in blue strikethrough or red underline.

h. ***Agriculture Uses.***

The Agriculture use category is for uses that are commonly associated with an agrarian or rustic lifestyle, and which demand little or no public infrastructure or services.

General Agriculture.

The production of grain, animals, food and fiber; the science and art of farming and ranching; ~~and~~ the work of cultivating the soil, producing crops and raising livestock; and the small-scale, intermittent harvesting and processing of livestock raised primarily on the premises. General Agriculture specifically excludes C~~c~~oncentrated Animal ~~f~~Feeding O~~o~~perations, Commercial Stables, and Nurseries. ~~where swine are confined, fed and maintained for 45 consecutive days or more in any 12-month period.~~ Any agricultural use that exceeds the thresholds established by Gardens and Homemade Foods shall be considered General Agriculture.

~~*Limited Agriculture.*~~

~~The production of grain, animals, food and fiber on a small scale where any impacts on potential adjacent property from storage, operations, and equipment can be internalized into the site or buffered from abutting areas, typically not occurring on lots or parcels larger than 10 acres.~~

Gardens and Homemade Foods.
Use of a property to grow, harvest, prepare or process any food or drink products that does not produce more than ten thousand (10,000) individual food or drink products annually and does not exceed ten thousand dollars ($10,000.00) in gross revenue annually from the food and drink products. Gardens and Homemade Foods shall include livestock if permitted in the zone district by operation of municipal code. Examples include small residential gardens, community gardens, and small-scale agricultural operations on larger parcels.

Agricultural Equipment Sales~~and Supply~~.
An Agriculture use where the land and buildings are used for retail sales of equipment and materials used for agricultural-related land uses, and accessory servicing of agriculture equipment.

Agriculture Product Sales / Farmers Market.
An Agriculture use where land, trucks, trailers, or ~~and~~ buildings are used for the retail sale of raw agricultural products in accordance with any applicable state and federal regulations. ~~and operated without any additional or permanent site facilities than are otherwise associated with agriculture use.~~ Road-side stands, food stands, ~~truck sales~~and sales from trucks or trailers~~, or barn sales~~ are examples of such uses. ~~, however the intensity and frequency of such sales shall be so that no additional parking, roads, structures, warehouses, or other storage facilities are necessary on the site.~~ This use involves less than 2,000 square feet of gross leasable sales area.

Agritourism.
A commercial enterprise that links agricultural production with tourism, inviting visitors to working farms, ranches, or agricultural businesses. This use includes activities such as pumpkin patches, corn mazes, petting zoos and similar uses.

Arenas and Show Barns.
An Agriculture use where the land and buildings are used for show or sale of livestock, rodeos, and where the public can attend these and other related activities.

Commercial Stables.
An Agriculture use where land and buildings are used for the business of boarding horses, donkeys, mules, burros, llamas or other similar ~~equine~~ animals.

Nurseries, Landscaping.
An Agriculture use to grow plants of any kind for transplanting to another location or for sale as live plants rather than as crops, including the sale of related equipment and supplies.

Concentrated Animal Feeding Operations and Slaughterhouses.
An Agriculture Use where livestock are confined, fed and maintained for forty-five (45) consecutive days or more in any twelve (12)-month period, or where livestock are harvested as a principal use. Concentrated Feeding Operations apply only to properties with greater

than one (1.0) animal unit per acre. Slaughterhouse shall not include personal or non-commercial harvest or incidental cleaning and processing of animals.

Summary: 2.2.3 Site Plan

Updates to this section are related to what uses require a site plan submittal. Many uses, including basic agricultural uses, have not been required to submit site plans. The proposed changes codify the allowances. Currently the UDC would require a site plan to establish grazing, possibly even to rotate grazing areas and crop areas. Staff does not believe this was the original intent of the UDC. Proposed changes to 2.2.3.b Applicability (under the site plan section) are below in blue strikethrough or red underline.

b. Applicability. An application for a site plan shall be submitted by the owner or authorized agent where any of the following occur:
   1. Any change of use or a new building.
   2. Alterations to the site affecting over 15% of the nonbuilding area of the site (examples include changes to parking, or open space and landscape areas).
   3. Any other development activity or change of use that triggers applicability and compliance with any of the Design Standards in Article 6.
   4. Any other on-site development activity or change of use that triggers improvements in the public right-of-way and applicability and compliance with any of the Standards in Article 4.
   5. No site plan is required for:
      (a) single ~~family,~~ Detached Dwelling, Accessory Dwelling Unit, ~~d~~Duplex, or ~~t~~Townhouse development, except ~~when associated with~~the common lots associated with Cottage Lots; ~~or a Regulating Plan or Development Master Plan.~~
      (b) limited business operations occurring in a single-unit residential property, including Group Housing, Live/Work if the non-residential use is not required to have a site plan, Family Child Care Home (FCCH), Family Child Care Center (FCCC), and Home Occupations;
      (c) Agricultural uses which are not expected to have significant customer impacts, including Nurseries, Landscaping; Gardens and Homemade Foods; and General Agriculture (if no on-site sales are proposed);
      (d) Cemeteries;
      (e) Military mission-oriented facilities

< The remainder of this page of the Staff Report intentionally left blank >

Summary: 5.1.4, Districts and Uses, (Table 5-1: Zoning District Uses)

The Use Table is amended to remove Limited Agriculture and include the uses added in Section 1.4.4. The amendment would also define what zones those uses are allowed in. An excerpt from the table showing these uses and their proposed permissibility is below. Proposed changes are in blue strikethrough or red underline.

Table 5-1: Zoning District Uses																					
Zoning Districts / *Category of Uses / Specific Uses*	AG	AR	RR	LR	MR	HR	NR-1	NR-2	NR-3	NB	CB	CBD	LI	HI	P	MUR	MUB	MUE	BP	AD	SS

Agritourism	P	P	P	C	C		C				C		P	P	P			P	P		P
Commercial stables; and arenas and show barns	P ~~C~~	C																	P		P
Nurseries, landscaping	P	P									C		P	P			C				P
Concentrated Feeding Operations and Slaughterhouses	S												S	S					S		

P = Use permitted by right A = use permitted after administrative review C = Use permitted after conditional discretionary review
S = Use permitted after special use review (blank = prohibited use)

Summary: 5.7.2 Home Occupations

The amendment proposes amending when a home occupation is required. For truly incidental operations, such as someone selling excess fruit to a friend, requiring a home occupation seems excessive. However, home occupations are generally required for someone using their house as a 'home base' for a registered business. The changes to this section propose some exemptions to the home occupation requirement. Proposed changes to 5.7.2.k Specific Allowances (under the home occupation section) are below in red underline.

k. Specific Allowances.

1. Mobile Service Providers Permitted at Client Residences. Certain businesses that involve providing services at a client's home are permitted to operate at the client's residence and are not subject to home occupation regulations at that location provided they meet all other regulations of this section and applicable local, state, and federal laws. Examples include house-call veterinarians, mobile massage therapists, mobile pet groomers, and similar providers.
2. Office-Only Use for Off-Site Businesses. A business that is not typically permitted to operate as a home occupation may be allowed if the home is used exclusively for office-related functions and no clients, customers, employees, or business activities

take place at the home provided they meet all other regulations of this section and applicable local, state, and federal laws. Examples include administrative work, scheduling, bookkeeping, or storage of vehicles or materials related to businesses that operate off site like food trucks, lawn care businesses, snow removal services, etc.

3. Garden and Homemade Foods. Garden and Homemade Foods, including personal or non-commercial harvest, and incidental cleaning and processing of animals are exempt from requiring a home occupation if the Garden and Homemade Foods are conducted without a defined business entity and there are no on-site sales. Garden and Homemade Foods conducted using a defined business entity or with on-site sales is required to receive home occupation approval.

Summary: 6.2.8 Parking Design

The changes to parking are considered different enough from the other proposed amendments that Staff will be running the change as a separate Ordinance. Staff is requesting a separate motion on this item. Issues with this section regarding the universal requirement to pave all access, drive, and parking areas have arisen outside of the agricultural context. However, agricultural uses are brought into the issue – at present, if someone wanted to establish a vegetable farm on City AG zoned parcel, they would be required to pave all accessways and parking areas on their site – even if there was no anticipation of customers vesting the site. The proposed amendment allows for certain exemptions from the paving requirement. Proposed changes to 6.2.8 Parking Design are below in blue strikethrough or red underline.

a. ***Location, Size and Landscape Requirements.*** All on-site parking shall be broken into smaller "parking blocks" and include landscape design according to the following Table 6-5. Specific zoning districts or design standards may further limit the general size and location of on-site parking spaces and parking blocks.

Table 6-5: Parking Location, Size and Landscape Requirements			
	Front	***Side***	***Rear***
250+ spaces	Must be broken into smaller parking blocks.*	Must be broken into smaller parking blocks.*	5% internal landscape; AND 8' perimeter buffer
151 to 250 spaces	10% internal landscape; AND 12' perimeter buffer	8% internal landscape; AND 10' perimeter buffer	5% internal landscape; AND 8' perimeter buffer
101 to 150	8% internal landscape; AND 10' perimeter buffer	5% internal landscape; AND 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer
31 to 100 spaces	5% internal landscape; AND 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer	No requirement
30 and under spaces	5% internal landscape; OR 8' perimeter buffer	5% internal landscape; OR 8' perimeter buffer	No requirement

* Where individual sites require or provide parking requirements larger than the maximum size, parking lots shall be broken into "parking blocks" meeting the size, location, and landscape requirements of this table.

1. *Perimeter Buffer Standards*. Perimeter landscape buffers shall be continuous around the parking block except at vehicle access points or any portion of the parking block that is bordered by buildings. The buffer shall include landscape materials meeting the requirements of Section 6.3. Where the landscape setback required by 6.3.3 is larger than the perimeter parking buffer required by Table 6-5, the greater buffer shall apply. Where perimeter landscape buffers include sidewalks meeting the internal pedestrian circulation requirements, the width of the sidewalk shall be added to the minimum required width for the perimeter buffer. Where parking blocks are located adjacent to one another, they may share the perimeter buffer along the common boundary provided it includes a pedestrian facility.
2. *Internal Landscape Standards*. Internal landscape area shall be provided as a percentage of the parking area, exclusive of drive aisles, as specified in Table 6-5. Internal landscape area shall be surrounded by raised curbs or other approved edge treatment that infiltrates stormwater, and shall include landscape materials meeting the requirements of Section 6.3. Internal landscape areas shall be allocated as end caps to parking aisles, as intermediate islands within aisles, or as buffer strips between aisles. All internal landscape areas shall be at least 8' wide in all dimensions, and shall be no less than 150 square feet in area. Where internal landscape areas include sidewalks meeting the internal pedestrian circulation requirements, the width of the sidewalk shall be excluded from the area calculation of the internal landscape area. Internal landscape islands shall include one large canopy tree per every 150 square feet, which may contribute to the tree points required by Section 6.3.4.
3. *Limitations in the Pedestrian Districts*. In the NB, MUR, and MUB districts, the following additional design standards and limitations shall apply:
   (a) No individual on-site parking shall be located within 20' of the front lot line unless it is located to the side of a building as provided in sub-section b;
   (b) Parking may be located to the side of the building in a limited manner provided:
      (1) the lot includes no more than 20 spaces at the side of the building;
      (2) the lot provides no more than two rows of spaces served by a single drive aisle, and is otherwise limited in width along the streetscape to the greatest extent possible; and
      (3) it is screened from the streetscape by a 2.5' to 4' decorative fence or wall matching the materials and architectural style of the building, and extended at the front building line.
   (c) Shared or public parking, or common "parking blocks" may be located along a street provided that the lot is no larger than 100 spaces, has a 8' perimeter buffer, and is screened from the street by a 2.5' to 4' decorative fence or landscape screen.
4. *Limitations in Residential Districts*. In all residential districts, where parking lots over 15 spaces are required for any use, the following additional design standards and limitations shall apply:
   (a) The parking area shall be setback behind the front building line or at least 30' from the front lot line, whichever is greater.

(b) All parking areas shall have an 8' perimeter buffer used to screen the area from adjacent residential uses.

(c) Individual parking blocks shall be no larger than 50 spaces for any one use.

5. *Exceptions*.

(a) The Director may approve exceptions to these design and location standards for lots under 10 spaces where:

(~~a~~1) It is reasonably necessary to accommodate infill development;

(2~~b~~) There has been no recent investment and is no anticipated investment in the public streetscape that will be negatively impacted by the proposed alternative location and design; and

(3~~c~~) The exception presents the least deviation from the standards necessary, and otherwise furthers the design objectives of this section.

(b) The Director may approve exceptions to ~~these~~the design and location standards of this subsection ~~for~~ for unpaved parking areas through the Administrative Adjustment process of this Code.

< The remainder of this page of the Staff Report intentionally left blank >

b. ***Dimensional Requirements.***

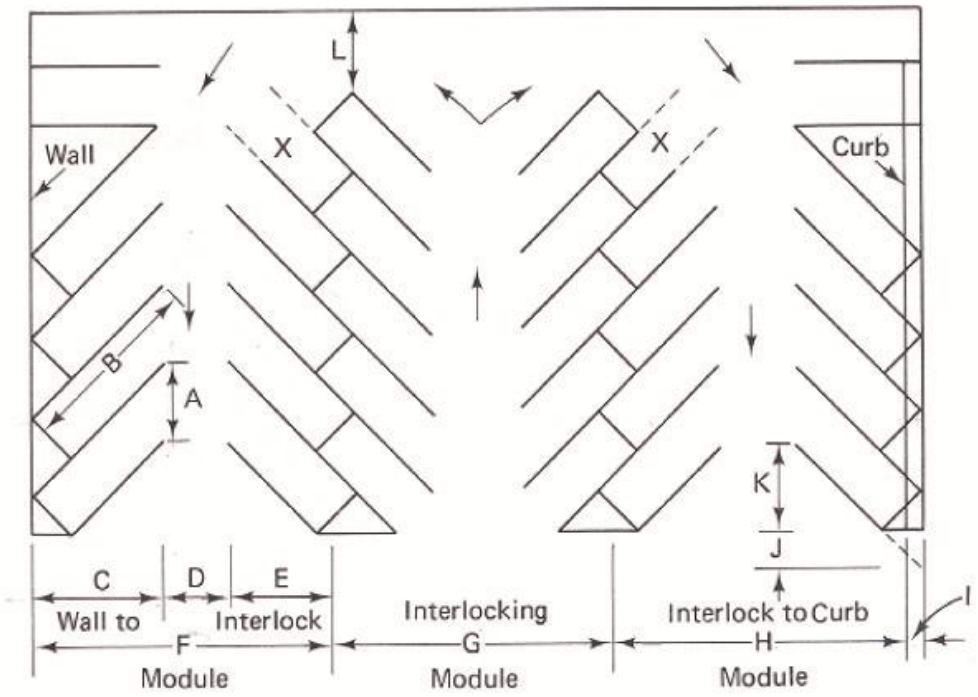

Figure 6-4 (Parking Layout Dimensions for Stalls at Various Angles)

Table 6-6: Parking Stall Dimensions and Layout							
Parking Angle / Width ~~(A)~~	***Width Parallel to Aisle (~~K~~A)***	***Depth to Wall (C)***	***Depth to Interlock (E)***	***Aisle Width* (D)***	***Module** (F, G, H)***		***Bumper Overhang (typical) (I)***
					Wall to Wall	***Interlock to Interlock (G)***

75° / 9.0′	9.3′	20.0′	19.0′	23′	63′	61′	2.5′
75° / 9.5′	9.8′	20.0′	19.0′	22′	62′	60′	2.5′
90° / 9.0′***	9.0′	18.5′	18.5′	26′	63′	63′	2.5′
90° / 9.5′***	9.5′	18.5′	18.5′	25′	62′	62′	2.5′

* Measured between ends of stall lines.

** Rounded to the nearest foot.

*** For back-in parking, aisle width may be reduced 4.0 ′.

X = Stall not accessible in certain layouts

c. ***Grading and Surfacing.*** All parking, circulation and loading areas shall be graded for proper drainage and be paved, unless specified otherwise in these regulations. The maximum grade shall not exceed 8%. The maximum desirable grade in any direction is 5%. Notwithstanding the surfacing requirement above, gravel or compacted aggregate surfacing may be used in lieu of paved surfacing in the following circumstances, subject to approval by the Director. Alternative surfaced areas shall be required to pave ADA spaces and accesses onto a public right-of-way in accordance with Article 4. The Director may not approve gravel surfacing if deemed inconsistent with the development standards or character of the surrounding area.

1. Agricultural Uses. Parking areas associated with agricultural operations, including farm stands, agritourism uses, and working farms, where the parking area serves as an accessory use to the agricultural activity and is located on property used predominantly for agricultural purposes.
2. Single Family Residential. Parking areas associated with Detached, Semi-attached, Attached Dwellings and related Accessory Dwelling Units.
3. Low-Usage or Overflow Parking. Overflow or supplemental parking areas serving low-frequency uses where peak demand occurs fewer than fifty-five (55) times per year, including but not limited to overflow parking for Civic Uses, Entertainment venues, Outdoor Recreation Facilities, parks, open space, trailheads, and similar outdoor and assembly uses.
4. Regional Stormwater Management. Parking areas where the applicant demonstrates, to the satisfaction of the City Engineer, that installation of impervious paved surfaces would adversely affect regional stormwater conveyance, groundwater recharge, or compliance with an adopted stormwater management plan. Such a demonstration shall be made through a site-specific stormwater analysis prepared by a licensed engineer, identifying the adverse impacts and explaining how gravel surfacing mitigates or avoids those impacts.

d. ***Parking Area Maintenance.***

The responsibility for the maintenance of parking areas provided for use by the general public, customers, or employees shall lie with the property owner and/or their agents. All parking areas and accessways, whether paved or surfaced with gravel or compacted aggregate, shall be permanently maintained in good and safe condition to prevent damage to vehicles, minimize or eliminate tripping hazards, and maintain ADA accessibility and, whenever necessary, be repaired to ensure continued compliance with the standards of this Code. Maintenance shall include patching cracks and sealcoating paved surfaces; filling potholes, grading uneven surfaces, recompacting compacted aggregate surfaces, repairing pavement depressions and uneven surfaces; and maintaining drainage flow, drainage conveyance methods, and drainage infrastructure. All parking area striping, directional arrows, and parking-related signage shall be maintained in a manner that they remain clearly visible. Maintenance shall also include maintenance of parking lot landscaping required under this Code, parking lot lighting, and keeping parking areas free and clear of weeds, junk, and nuisances.

ANALYSIS OF CONFORMANCE WITH REVIEW CRITERIA:

Review of a UDC text amendment shall be measured by the following three (3) criteria of Section 2.4.1.d:

1. **COMPREHENSIVE PLAN**:
   "The amendment is in accordance with general goals and policies of the Comprehensive Plan, or is necessary to address an emerging issue not anticipated in the Comprehensive Plan and is not inconsistent with the plan."

   PlanCheyenne encourages minimizing conflicts between development and agriculture, and preserving the region's ranching and agricultural heritage. Specifically, Policy 5.5.C encourages the County to develop tools to support the business of agriculture and ranching. Although strictly the plan requests the County to address these issues, the principles included could apply to recently annexed land or even to more urban lands for smaller operations. These principles include home-based operations, roadside stands, and agritourism.

   PlanCheyenne encourages attractive, useful, and integrated parking areas, including flexibility for infill or re-use sites. Pavement is not specifically mentioned for parking lots, other than to discourage large expanses of pavement.

   PlanCheyenne also encourages flexibility to respond to market demands and a business-supportive environment – especially for smaller businesses and entrepreneurs. These smaller-scale businesses and entrepreneurs may be looking to start small with 'overflow' parking areas or to provide new agricultural uses. The proposed code gives staff the tools to right-size regulation to the proposed use or disturbance of land.

2. **STATE STATUTORY REQUIREMENTS**:
   "The amendment is consistent with the Wyoming Statutes, and specifically the Municipal Planning and Zoning statutes." (The following Articles are all listed verbatim from Wyoming State Statute)

   From ARTICLE 6 – ZONING of TITLE 15 CITIES AND TOWNS:

   WY 15-1-601. Regulations; scope and purpose; uniformity within authorized districts; to follow plan; objectives.

   (a) The governing body of any city or town, by ordinance, may:

   (i) Regulate and restrict the:

   ….

   (E) Location and use of buildings, structures and land for trade, industry, residence or other purposes.

   …

   (d) All regulations shall be made:

   …

(ii) With reasonable consideration, among other things, of the character of the district and its peculiar suitability for particular uses;
(iii) With a view to conserving the value of buildings and encouraging the most appropriate use of land throughout the city or town;

Assessment: This amendment proposes modifying the Unified Development Code to provide additional local land use control of specific uses within the City, which is authorized by state statute.

3. **HEALTH, SAFETY, AND PUBLIC WELFARE**:
"The amendment promotes the general health, safety and public welfare."

Although some may argue that unregulated food production and sales may have possible detriments to public health, others may argue that access to local, unprocessed foods supports the public health. The State has determined that the local, small-scale production and sale of food is appropriate for the general welfare of the state – including clear labeling of such foods, and the UDC matching this determination is appropriate. Clarifying uses and processes are not detrimental to the public health, safety, and welfare.

Gravel parking areas are generally less safe for the public, but large expanses of underutilized paved areas can be detrimental to the public welfare due to effects on drainage, heat, and cost to maintain. Allowing parking lots to be unpaved in areas with less traffic or in more natural areas would be a net gain to the public benefit.

PUBLIC NOTICE AND PUBLIC COMMENTS RECEIVED:

Although projects have public notice and the opportunity for public comments, projects are required to be approved or denied based on the review criteria (listed above). Public comments relevant to the review criteria may assist the review and discussion on the application.

This item was advertised in the paper for the September 6, 2026, Planning Commission, and published online on August 13, 2026. The website has received 831 views and 8 comments.

As of the publication of the Staff Report (September 14, 2026), Staff has received the following inquires or comments from the general public on this project:

- Various comments from the Wyoming Department of Agriculture asking staff to refine definitions and adjust references to state and federal regulations. This included a request to reduce the quantities set under 'gardens and homemade foods'.
- Comments received via letter:
    - "1. Will the removal of the term "nurseries" prevent WyFresh from propagating plants for sale in the spring? We don't want to take a chance that this propagation may be eliminated because it is considered a "nursery." Is "nursery" defined anywhere that could be of assistance with this question?"

  - "2. Does the elimination of the term "supply" prevent the Kniseleys/WyFresh from selling BioComplete compost/poultry grit and calcium and extract. These items are prepared on site and sold because they are not otherwise available in Cheyenne."
  - "3. In terms of General Agriculture. What is the meaning of "small-scale, intermittent harvesting and processing of livestock"? How are small-scale and intermittent defined and at whose discretion?"
  - "4. We are also concerned about the change in definition and the prohibition for "Concentrated Feeding Operations and Slaughterhouses." Normally, a "concentrated feeding operation" is large with around 1,000 animals, but this definition - feeding for 45 days in a 12- month period makes it appear that even raising a few animals including chickens, other poultry, rabbits, calves, pigs, etc. will not be permitted."
  - "5. Does the statement, "if no on-site sales are proposed" pertain only to landscaping or does it also pertain to General Agriculture?"
  - "6. There is no key, so it is unknown what "S" stands for, can you let us know? It appears to be a prohibition, but that is not clear."
  - "7. Is the requirement for "home occupation approval" difficult to achieve, what are the parameters of this? Is it the same as a home occupation "license." Is there a chance that the Kniseleys/WyFresh would be denied this approval?"
  - "8. AG is exempted under paragraph c, "grading and surfacing." Does AG need to comply with parking designs in 6.2.8 (location, size, landscape)?"

- Comments from Online (Public Input):
  - "WYfresh will have comments forwarded to Planning through our attorney, Gay Woodhouse. At this point the amendments are inadequate to address our needs or those of Urban Farming in general."
  - "1. Table 5.1.4 is pointless, because no key is provided to decipher the acronyms. Please provide one and make it available to the public for comment."
  - "2. Slides presented by Mr. Bloom, the Planning and Development Director of Cheyenne, were not the same as the printed material provided at the work session or available online. Please make it available so the public can comment."
  - "3. Even though it's not written, Mr. Bloom expressed the intent of the city for Agriculture Product Sales / Farmers Market was to limit the buildings to temporary buildings only. The buildings would not allow public occupation, need to be open less than six months of the year, and hand-washing sinks may be problematic. This obviously has significant negative impacts to the WYfresh farmstand. Please include your intent and open it up for public comment."
  - "4. Referencing #3 above, how is the time frame calculated? Consecutive days? Please include and open it up for public comment."
  - "5. The agenda and video of the August 21, 2026 Special Meeting are missing from the city of Cheyenne's website. Please include them for transparency."
  - "6. Please note that the other family whose home is being annexed, was not informed of the proposed changes in code that will affect their home and

possible livelihood. Please inform those affected by code changes for transparency."

- "I think the city council should oust the people that are using gravel parking , everything that is proposed before them make a decision"

Staff notes on comments received:

- Various concerns and recommendations have resulted in defined changes to the proposed ordinance.
- There was no intent for this set of regulations to set up defined 'temporary uses'. The uses are intended to establish permanent uses and include permanent buildings. Permanent uses will be required to have a site plan (unless listed as one of the exempt uses) and permanent buildings are expected to meet applicable building code requirements.
- Any discrepancies between the text that was made available online and in the work session was unintentional. Due to comments received, edits have been made to the proposed text, and the text in this Staff Report is the most current edition. Text could be further edited by the Planning Commission.

CONCLUSION:

Staff is satisfied that the application meets the review criteria set forth in UDC 2.4.1.d.

ALTERNATIVES:

1. Recommend approval of the Text Amendment as submitted by the applicant (**Staff Recommendation**).
2. Recommend approval of the Text Amendment subject to conditions or modifications.
3. Recommend denial of the Text Amendment based on findings of denial. The Planning Commission must conclude that the project does not meet at least one of the review criteria. As part of the motion, findings for denial must be stated.
4. Postpone the Text Amendment until issues identified during the meeting can be resolved.

General Information Regarding Alternatives:

If the Commission acts contrary to staff's recommendation or recommends conditions of approval, the Commission shall cite specific reasons (based on the review criteria) for their recommendation.

STAFF RECOMMENDATION:

Staff recommends approval of text amendments amending the Unified Development Code (UDC) amending 1.4.4 Descriptions of Uses of Land and Buildings; 2.2.3 Site Plan, 5.1.4 Districts and Uses, 5.7.2 Home Occupations, and 6.2.8 Parking Design.

The Honorable Mayor Collins and Members of the Cheyenne City Council
c/o Chief of Staff Amber Ash
2101 O'Neil Avenue
Cheyenne, WY 82001

RE : Wy Fresh Farms/David and Tommie Kniseley Annexation

Dear City of Cheyenne:

In anticipation of the November 9, 2026 vote on the Third and Final Reading of the Annexation Ordinance which may incorporate WyFresh Farms ("Farm") into the City of Cheyenne, we are asking that the following issues be addressed in a comprehensive manner before that meeting.

The following are the items that need to be addressed. We want to work cooperatively with the City to seek urban farm definition and ordinances that support WyFresh Farms and allow it to continue as a working farm with farmstand and to promote future growth of the Farm. We look forward to following the city's directive that "the City's intent is to allow WyFresh to continue to operate, expand within code and thrive as an agricultural enterprise within the city limits."

1) An Ordinance that clearly defines Urban Farm and includes the language the Right to Farm Act specifically stating that farm operations are not considered a public or private nuisance as long as the farm operation conforms to generally accepted agricultural management practices. This Ordinance shall include livestock (as defined in W.S. 11-6-302(a)(vi), guardian dogs, terrier dogs for rodent control, barn cats, and other farm animals. It should also provide for expansion within the boundaries of the annexed property.
2) An Ordinance that permits the use of installation of electric fence on the property which may be constructed in a manner regarding the size, structure and placement which will keep predators at bay.

3) An Ordinance which allows for the annual movement of temporary structures including but not limited to caterpillar tunnels, hoop houses and low tunnels used for growing products on the property without further permitting during any given year.
4) An Ordinance that includes the Farmstand's continued operation and does not unreasonably limit the number of customers or vehicles that may access the Farmstand per year.
5) Ordinances which modify the need to clean trash on the borders, especially those borders where the trash comes from outside the boundaries of WyFresh's property.
6) City of Cheyenne commits to conducting drainage studies to deal with the drainage that is coming from offsite improvements onto the WyFresh property which damages the fences and the land.
7) City of Cheyenne completing the work on the City damaged fences on the east side of the property as well as the southwest of the property. WyFresh would like to have this matter addressed promptly in accordance with the offer and response that was made by Doug Klahn in February. (see attached). WyFresh would like to partner with the City for additional fencing to ameliorate the problems with not being able to use firearms to fight predators.
8) City of Cheyenne installing barriers to prevent vehicles from causing damage to the fences on the property.

We are asking that drafts of the pertinent ordinances and code be provided by mid-June to ensure that they could be passed in time for WyFresh to believe that the true meaning of Urban Farm is captured and that the rights that they have as a farm are being preserved. We understand from some of our meetings and representations made at City Council meetings and Committee hearings, that the language for most of these issues have already been drafted.

We look forward to working with you cooperatively to make annexation a favorable choice for WyFresh farms.

Respectfully submitted,

Gay Woodhouse

Request for Amendments to Rules Regarding Agriculture
10/05/2026
WY Fresh Farm, 200 Walterscheid Blvd, Cheyenne

Amend 6.08.090 Add C. = "This section shall not apply to any working farm."

Amend 6.08.110 Add "except as provided by WY Statute 11-44-103"

Amend 6.08.030 C Add #5 Livestock Guardian Dogs, Rodent Control Dogs and Barn Cats

Amend 6.08.070 Add "This section shall not apply to any Livestock Guardian Dog."

Amend 8.60.035 Add "This section shall not apply to any working farm."

Amend 8.60.030 Add "except as is consistent with WY Statute 11-44-103"
